BESPOKE SOLUTIONS

Creativity is in our DNA

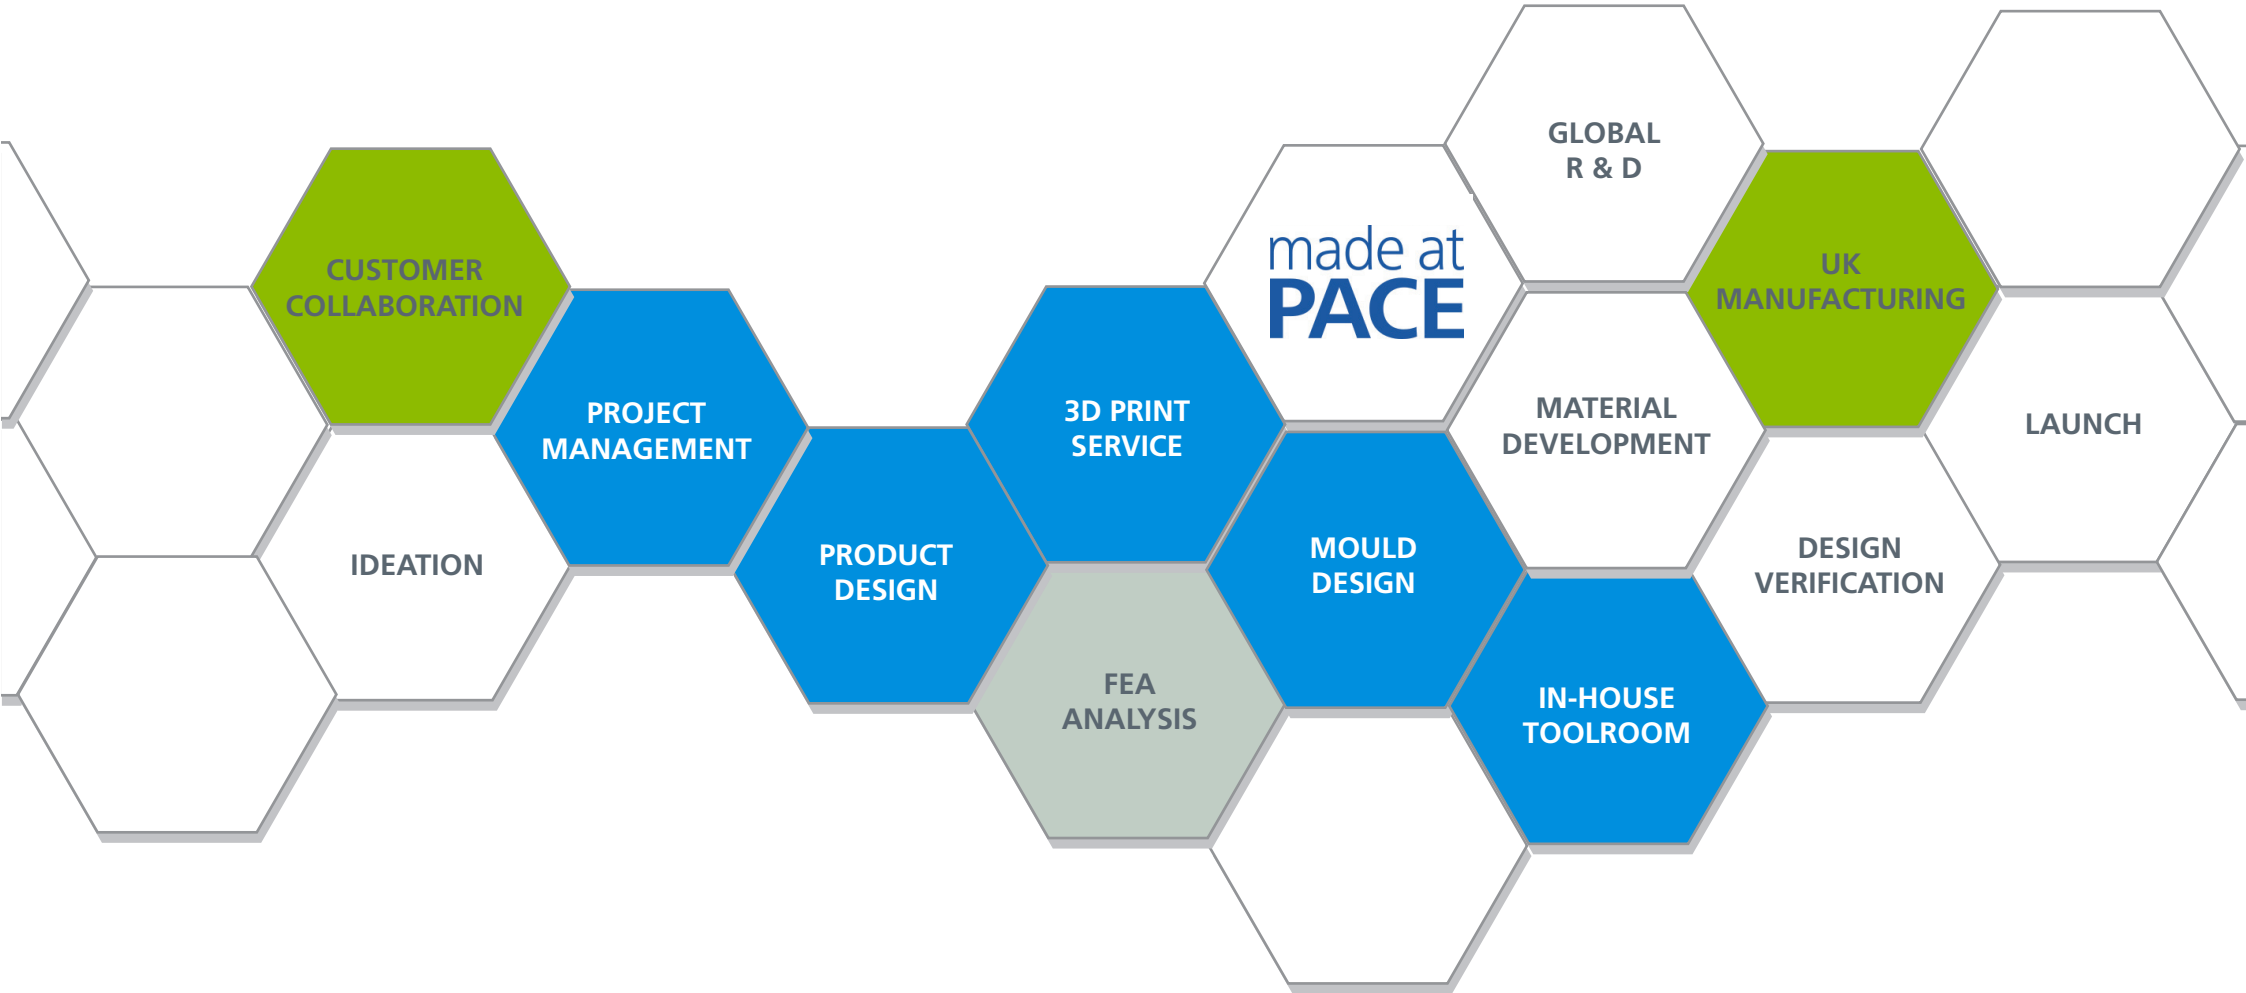

YOUR DEVELOPMENT PARTNER

We offer a unique blend of creativity and technical know-how, thriving on complex problem solving.

Working in partnership, our flexible collaborative approach allows us to add value to your business.

OUR INNOVATION SERVICES

HellermannTyton

OUR COMPETENCY

Specialists in manufacture of technically complex products in high performance engineering polymers.

We compound material blends to ensure the best functional properties for each individual application.

HellermannTyton

OUR COMPETENCY

Engineered products, that when assembled, seamlessly come together to create bespoke products.

We create complex assemblies to provide a simple solution to your design problem.

Product Assemblies 5

HellermannTyton

OUR COMPETENCY

Two materials within a single component add value in demanding applications.

Combine a rigid engineering substrate with a soft flexible polymer for anti-vibration and enhanced compression.

Twin Shot Moulding 6

OUR COMPETENCY

Two materials within a single component can be achieved by insert moulding.

Hybrid products of this nature often have locally reinforced areas with metal bushings for high torque resistance.

HellermannTyton

OUR COMPETENCY

High performance polymers excel in many applications but not all.

The most extreme conditions require us to manufacture high tolerance metal fastening solutions.

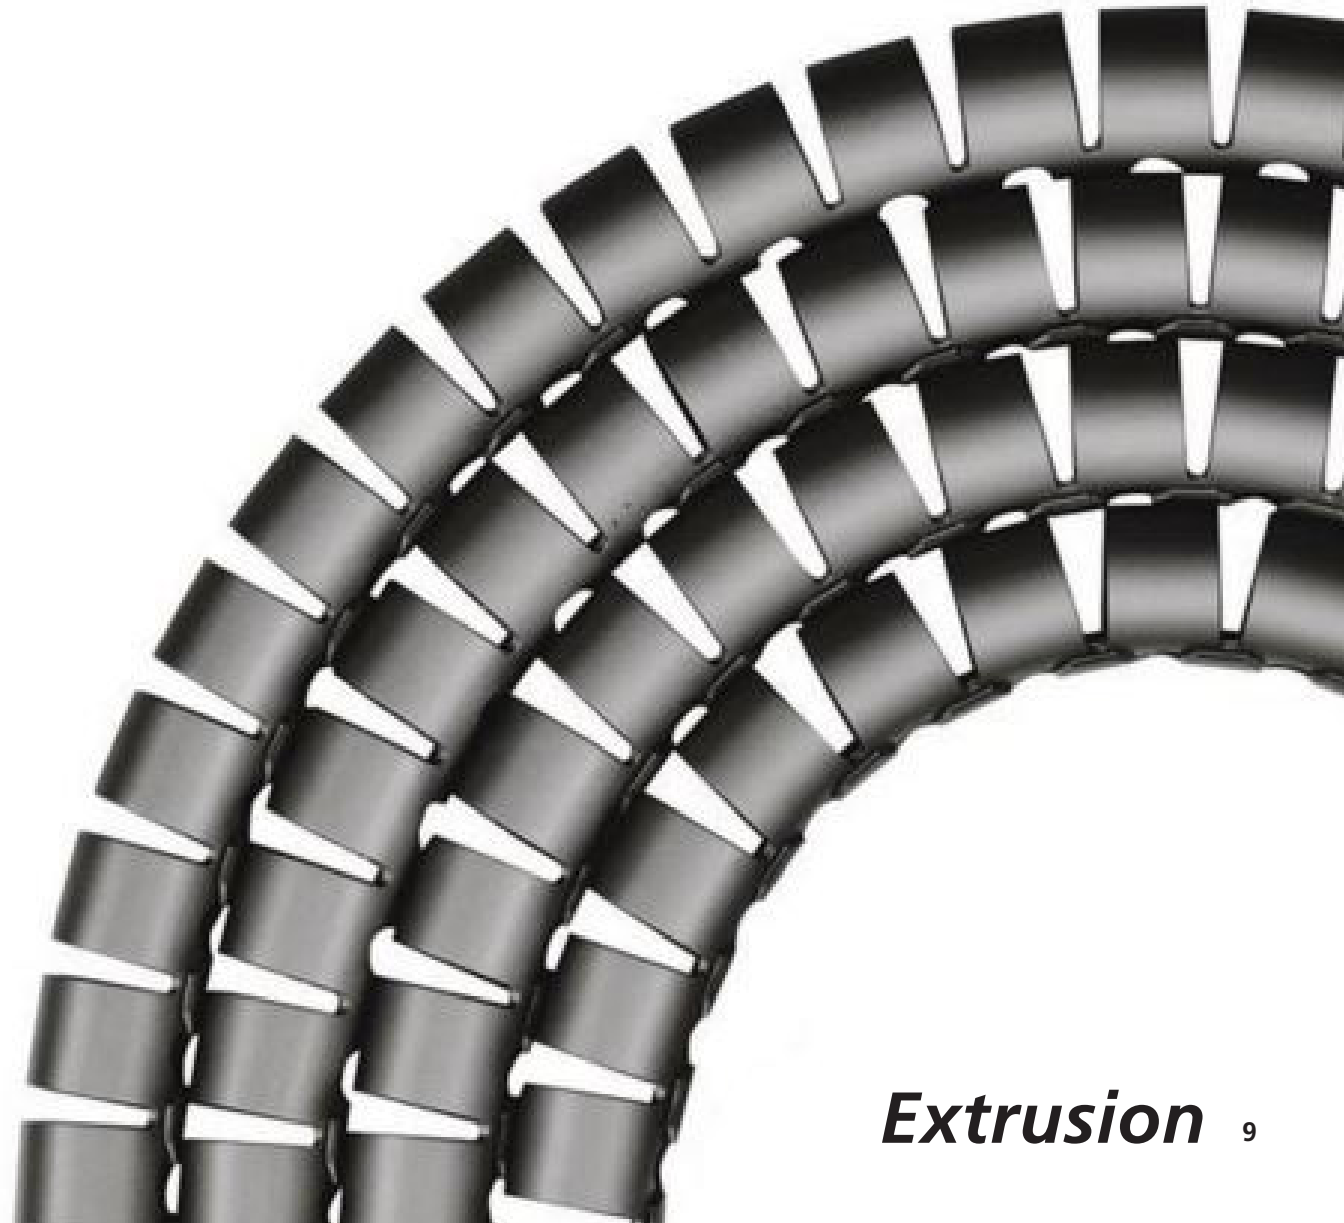

HellermannTyton

BESPOKE SOLUTIONS

Extruded products offer protection and enhanced strength, as well as identification.

Secondary process such as profiling and printing further enhance our service capability.

HellermannTyton

BESPOKE SOLUTIONS

Moulded shapes strengthen joints and providing strain relief.

We compound all our specialist materials in-house to suit exacting requirements of our customers
