THE EXCITING NEW IDENTIFICATION PRINT SERVICE FROM HELLERMANNNTYTON

Thermal Identification Printing Systems

TIPS24 is a next day printing service that is ideal if you don't have your own on site printing system or you have varied and complex marking requirements. Perhaps you would simply rather concentrate your resources on marking your cables, not making up cable markers. And there's the added bonus of no stock holding!

By combining the latest thermal transfer printing technology with specially formulated inks to make your marks clearly visible and durable, TIPS24 will produce professional cable identification products for you time after time. 3:1 shrink ratio polyolefin tubing (available semi severed to 25mm or 50mm lengths in strips or on reels) and TIPTAG route markers make up the TIPS24 range.

DELIVERY OPTIONS

- Standard next day*
- Next day before 10.00am*
- Next day before noon*
- Saturday before noon*

* Please note that the cut off time for next day delivery orders is 2.00pm.

TIPS24 PRODUCTS

TIPS24 cross-linked polyolefin tubing has good mechanical strength and good resistance against organic solvents and chemicals. It is self extinguishing and highly flexible. With a shrink ratio of 3:1, one size can cover a wide range of cable diameters.

COMMERCIAL GRADE
TIPS24C tubing complies with CSA approval.

MILITARY GRADE
TIPS24U tubing complies with UL224 VW-1 and CSA approvals and is manufactured from a material that conforms to AMS-DTL-23053/5.

TIPTAG is a marking tag for large diameter cables, looms, conduits, pipes etc and is attached by cable ties.

TIPTAGs are made from an LFH grade polyolefin compound. In a fire situation, it will produce minimal toxic gases and corrosive acid and has low smoke generation. For details refer to specification – BS 3G 198-3 Type 15.

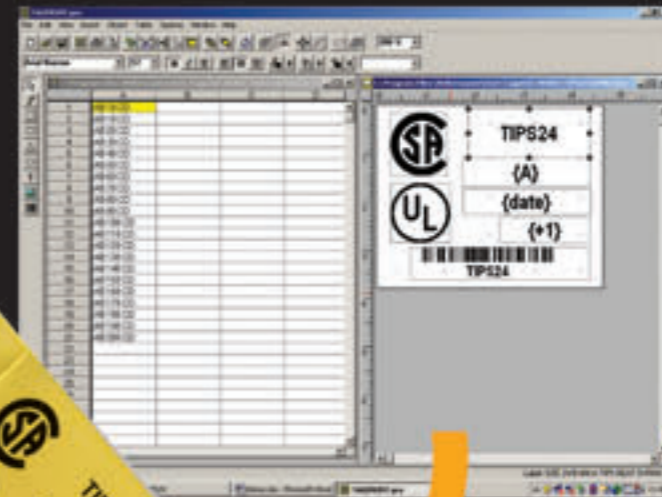

2x FREE CABLE TIES
with each TIPTAG
