

1.0 Technical Information

Operating temperature ranges of cable tie materials	20
Locking technologies for cable ties	21
Optimum storage conditions for cable ties	22

1.1 Cable ties, inside serrated

T-Series		
standard, natural and black	PA66	23, 24, 25
standard, coloured	PA66	26, 27
for outdoor use, black	PA66W, UV-resistant	28, 29
temperatures up to +105 °C	PA66HS, heat stabilised	30, 31
for higher impact resistance, ScanBlack	PA66HIR(S), high impact modified	32
made from Post Industrial Recycled PA66	PA66HIRHS(REC)	33
for higher fire-protection	PA66V0, flame-retardant	34
temperatures up to +150 °C (short-term)	PA46	35
for higher chemical resistance and temperatures of -80° to +170 °C	E/TFE	36
for higher chemical resistance and temperatures up to +115 °C	Polypropylene (PP)	37
sustainable bioplastic, black	PA11	38
In-between size to T-Series	LK-Series	39
For temperatures up to +240 °C	PEEK-Ties	40
With smart design	X-Series	41
For hose and gaiter	CTT-Series	42
For parallel routing	DH-Series	43
For food industry		
detectable	MCT-Series	44
detectable, corrosion resistant	MCTS-Series	45
detectable	MCTPP-Series	46

1.2 Cable ties, outside serrated

For thin-walled bundles		
	OS-Series	47, 48, 49
	S-Series	50
For temperatures up to +240 °C	PEEK-Ties	51
With 90° angled head	V-Series	52
With low profile head	PE-Series	53
	RPE-Series	54
standard and high impact modified	LPH-Series	55
	SPH series	56
For strong hold		
on smooth bundles	Soft Grip-Series	57

1.3 Cable Ties without serration

Locked by glass fibre pin		
1-piece	KR-Series	58
ultrasonic welded	KR-Series	59
endless	KR-Series	60
With separate head and spacer		
endless	EL-TY-Series	61

1.4 Cable ties, releasable

Inside serrated		
with extended pawl, up to 200 N	RELK-Series	62
with extended pawl, up to 670 N	RLT-Series	63
with tuckaway	RT250-Series	64
with kickdown lever	REL-Series	65
Outside serrated		
for marking purposes, coloured	LR55-Series	66
	ORF-Series	67
Without serration		
flexible at low temperatures	SRT-Series for industry quantities	68
	SOFTFIX-Family	69
Inside serrated		
one-hand release mechanism	REZ-Series	70
For food industry		
detectable, releasable	MCT-Series, PA66MP	71
With quick release mechanism		
up to 888 N	Speedy-Tie	72
With hook and loop		
for identification purposes, coloured	TEXTIE-Series	73

1.5 Cable ties, stainless steel

Technical Information	
Locking technologies for metall cable ties	74
Short Circuit Test (SCT)	75
With ball-lock	
standard metal ties	76, 77
double wrapped	78, 79
coated	80
double wrapped, coated	81, 82
double wrapped, coated	83
With punch-locking mechanism	
high vibration resistance	84
With fold locking	
uncoated	85
coated	85, 86
Protective channel for stainless steel ties	
endless	LFPC-Series 87

1.6 Fixing products for holes

Selection guide for fixing ties		88
Fixing ties for round holes		
	in the strap	90
		91, 92
	Soft Grip-Series	93
with arrowhead and disc	up to +240 °C, PEEK	94, 95
	releasable	96
	sealed	97, 98
	anti-slip	99
with arrowhead and wings		100
Fixing ties for oval holes		
with arrowhead and wings		101, 102
with arrowhead and disc		103
Fixing ties for round holes		
with arrowhead and wings	releasable	104
with arrowhead	without wings and disc	105
with arrowhead and disc	parallel routing	106
Fixing ties for oval holes		
with fir tree and disc		109

Fixing ties for round holes		
	releasable	110
	with stand-off	111
	FT3	112
	FT5	107, 113
		107, 108,
with fir tree and disc	FT6	113, 114
	FT7	108, 115
	FT8	108, 115
	FT9	116
	FT10	116
	with cover	117
	Soft Grip-Series	118
Fixing ties for oval holes		
with fir tree and disc		119
Fixing ties for round holes		
with deep hole anchor		120, 121
Fixing elements for round holes		
for cable ties	with arrowhead	122
	for distance routing	123
with fir tree	for automatic cable tying systems	124
Fixing elements		
for T-slotted aluminium profiles		125
Fixing elements for round holes		
with arrowhead	Wire push in clips	126
	Harness push in clips	127
with arrowhead and disc	for pipes and harnesses	128
	for cable ladders	129
with arrowhead	for pipes and harnesses	130
Fixing elements for oval holes		
with arrowhead	for pipes and harnesses	131
Fixing elements for round holes		
with fir tree	for pipes and harnesses	131
connectable	for pipes and harnesses	132
with fir tree	for pipes and harnesses	133
Fixing elements for oval holes		
with fir tree	for pipes and harnesses	133
Fixing elements for round holes		
with fir tree	for pipes and harnesses	134
Fixing elements for oval holes		
with arrowhead	for corrugated tubing	135
Fixing elements for round holes		
with fir tree	for corrugated tubing	136, 137
for cable ties	for walls	138
for cable ties	TY5-Series, rivet mount	139
rivets	TY-Series	140
Blind plugs		
		141

1.7 Fixing products for bundles

Bundling clips for round holes		
with arrowhead	sealed	142
	for distance routing	143
with fir tree		144
Bundling clips for oval holes		
with fir tree		144, 145
	for distance routing	146
Bundling clips for weld studs		
	lateral adjustment	147
	for distance routing	147
Bundling clips for edges		
with edge clips		148

1.8 Fixing products for bundle separation

For parallel routing		
twistable up to 90°	with coupler	149
twistable up to 360°		150
twistable 360°	Swivel mounts	151

1.9 Fixing products for self-adhesive fixing

Technical information		
Installation of self-adhesive mounts		152
Paste adhesive fixing element		
In-Line Ratchet P-Clamp	for fixing with paste or liquid adhesive	153
Paste adhesive mount		
round cable tie mount	for fixing with paste or liquid adhesive	154
High performance adhesive		
squared cable tie mount	for round and angled surfaces	155
squared cable tie mount with cable clip	for round and angled surfaces	156
squared cable tie mount with cable tie	for round and angled surfaces	157
squared cable tie mount	SolidTack-Series QM	158
Standard adhesive		
squared cable tie mount	Q-Mount-Series QMA	159
High performance adhesive		
squared cable tie mount	SolidTack-Series MB	160
Standard adhesive		
squared cable tie mount	MB-Series	161
High performance adhesive		
squared cable tie mount	SMB-Series, 360° rotation	162
squared cable tie mount set	MB-Series + S50ROS cable tie	163
Magnetic		
squared cable tie mount	MAGMB-Series	164

Standard adhesive		
rectangular self-locking base mount	for flat ribbon and round cables	165
rectangular cable tie mount	TY-Series	166
squared cable clip mount	RA-Series	167
Magnetic		
squared cable clip mount	MAGRA-Series	168
Standard adhesive		
squared cable clip mount	RB-Series	169
Magnetic		
squared cable clip mount	MAGRBS-Series	170
Standard adhesive		
squared cable tie mount	with flat cable clip	171
square base mount	with flexible cable clip (ALU)	172

1.10 Fixing products for connectors

Fixing ties		
	with connector clip	173
Connector clips		
for round holes	with fir tree	174

1.11 Fixing products for weld studs

Fixing ties for weld studs		
cable routing above the stud		175
cable routing alongside the stud		176
lateral adjustment		177, 178
	heavy duty applications	179, 180
parallel routing		181, 182, 183
multi-parallel routing		184
cable routing above the stud	for small cable diameters	185
Fixing elements for weld studs		
for cable ties		186, 187
for tubes and harnesses	with automatic locking feature	188

1.12 Fixing products for screws

Fixing ties for screws		
with mounting head		189
	HDM-Series	190
for heavy duty applications	parallel routing	191
		192
Fixing elements		
for multiple parallel routing	SRC-Series	193
Fixing ties for screws		
	Soft Grip-Series	194
Cable tie mount		
squared	MB-Series	195
	for food industry, detectable	196
rectangular	TY-Series	197
rectangular, self-locking	for flat ribbon and round cables	198
	for limited space	199, 201
rectangular	CTM-, KR-, MCKR-Series	200
	Stainless Steel mounts	202
	concave tying area	203
	for limited space	204, 205
for sideways fixing	LKM-, CL-, FH-Series	206
Clamps with elasticated loop		
	concave tying area	207
Strain relief clips		
	Klam-Klip (KK)	208
Fixing elements for heavy duty applications		
	Torque mounts	209, 210
	for parallel separation	211
	for edges	212
	for 3-way routing	213
		214
Ratchet P-Clamps		218
	Accessories	218
Inline Ratchet Clamps		219
Aluminium cable clamps		220
Plastic cable clamps		221
Mounting plates		222

1.13 Fixing products for edges

Fixing ties for edges		
top and side fixing		223
		224, 225
0.5 - 2.5 mm		226
1.0 - 3.0 mm		227, 228, 229
3.0 - 6.0 mm		230, 231
6.0 - 8.0 mm		231
twistable		232
1.5 - 4.0 mm		233
1.0 - 3.0 mm	parallel routing	234
Fixing elements for edges		
Frame clamp-sets		235
Beam clamps		236
heavy duty applications	multi parallel routing	237
for tubes and harnesses		238
for automatic cable tying systems		239

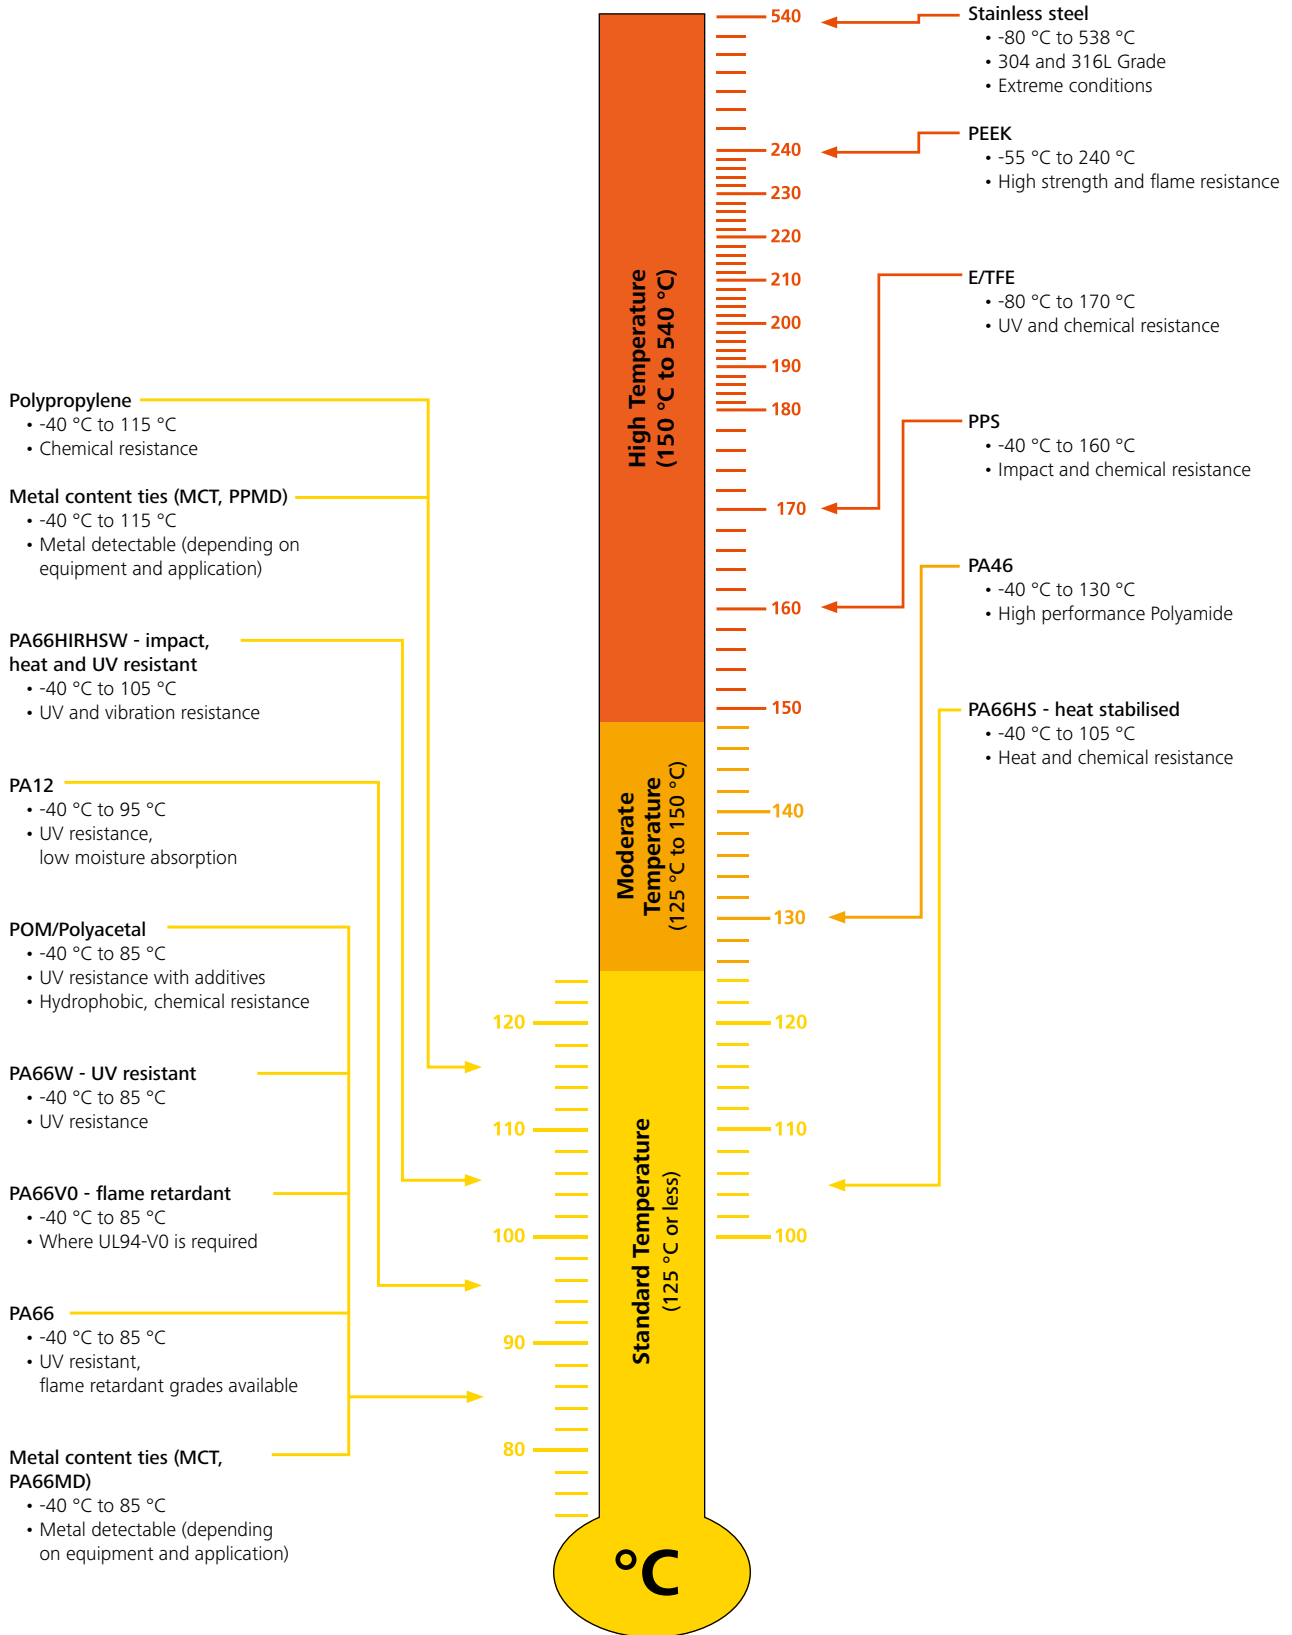

1.14 Fixing products for pipes and harnesses

Fixing ties with pipe clip		
twistable 360°		240, 241, 242
		243
twistable 360°	IAHC-Series	244
	for parallel routing	245
Fixing elements		
multi parallel routing		246, 247, 248
Snapper hose clips, SNP-Series		249

Operating temperature ranges of cable tie materials

This Material Selection Guide illustrates the minimum and maximum operating temperatures for cable ties according to the material from which we manufacture them. It gives an overview of materials HellermannTyton uses to manufacture cable ties. Please contact our sales team to check availability of products in your preferred material.

Introduction to the main locking technologies used for cable ties

HellermannTyton offers a wide range of cable ties for use in different applications. By constantly refining our products and satisfying the ever-changing demands of the market, various locking technologies have been developed. Below you will find a brief overview of three most common locking technologies and their characteristics.

Cable ties with plastic pawls

This technology is used in 90 % of all polyamide (PA) cable ties applied by HellermannTyton. In order to cover a variety of applications, there are different variants of this system, for example: releasable versions, in-line versions, open head versions.

These are one-piece cable ties, the pawl is moulded as an integral part of the cable tie, thereby building in inherent strengths.

Locking technology

Positive locking is achieved by engaging the pawl with the strap serrations. This allows the cable tie to perform to the published minimum tensile strength, that is the loading that the cable tie can hold under application.

Locking technology of an outside serrated tie. A: Cable tie head B: Cable tie C: Direction of thread

KR series cable ties

This cable tie is distinguished by its smooth strap and unique locking mechanism. With the KR series the chamfered head achieves an especially firm fit around the bundled material.

Locking technology

This locking technology takes advantage of the excellent deformation properties of polyamide (PA). Here, the glass fibre-reinforced locking pin (yellow) is forced into the strap by the use of an application tool - either the KR6/8 or KR8PNSE. The strap is deformed into the head of the tie by the application of the pin, thereby locking the cable tie in position and allowing the bundling of heavy loads.

The unopened head (yellow) of a KR-tie.

The cable tie (red) is locked into place with the pin.

MBT series cable ties

Made of stainless steel grade 304 or 316L, the MBT range of cable ties has no serrations on the strap and is threaded parallel through the head, gliding under a metal ball-bearing locking mechanism. By using an appropriate application tool like our MK9SST the cable tie is easily and quickly tensioned, with the strap cut to a flush finish.

Locking technology

The strap is locked into the head via a ball bearing. The ball locks into the small end of the wedged shaped housing, forming a positive lock with strap.

For rigid objects such as metal pipes, we would recommend our protective channelling (LFPC) to be laid between the bundled object and tie strap. This not only provides protection against galvanic corrosion, but also ensures a better engagement with the bundle. The MBT locking technology keep the minimum tensile strength of up to 7,000 Newtons and standard strap lengths of up to 1.5 m.

1. Initial position, ball bearing moves freely. A: Cable tie (inserting)

2. Ball rebounds and wedges tie in place. A: Cable tie (tightening) B: Ball (wedged)

Introduction to the main locking technologies used for cable ties

MST series cable ties

MST cable ties are made of stainless steel 304. They offer similar features to MBT products but with a different head design and closure. Where space is tight the flat head allows for space savings. MST cable ties are not only weather-resistant but also highly resistant to heat, fire, and radiation. It can be used in challenging environments including indoor, outdoor and underground installations.

Locking technology

The punch-locking mechanism keeps the lock tight even in challenging areas with very high vibration such as on trains. Our MST application tools (MST6/MST9) have been specifically developed for tightening and cutting MST cable ties. This tool is mandatory to apply and lock these stainless steel cable ties properly.

Punch-locking mechanism of the MST-Series. A: Cable tie
B: Application tool

Optimum storage conditions for cable ties made of Polyamide (PA)

HellermannTyton cable ties, fastenings and fixings are manufactured from high-quality polyamide (PA). This industrial synthetic material is mainly processed using injection moulding, but can also be extruded. Polyamide is a hygroscopic material. This means that the material absorbs and loses moisture. For optimum handling of cable ties it is

important that the material is in a condition of equilibrium with a water content of approximately 2.5 %.

The packaging used by HellermannTyton ensures that the water content in the material remains constant. Therefore, it is important to store the products in their original packaging to preserve the quality of the ties.

1. Once opened you should use the ties as quickly as possible.
2. Always store ties in the sealed plastic bag.

5. Store the product away from direct sources of heat.
6. Avoid contact with heat: for example, do not place on the radiators.

3. Do not expose the product to direct sunlight.
4. Do not store the product in sunlight; for example, on the windowsill.

7. The ideal storage conditions are those of the central European standard climate: 23 °C

50% relative humidity

Cable ties polyamide 6.6 standard

T-Series in PA66 natural and black

T-Series cable ties for bundling and securing of cables, pipes and hoses. These cable ties can be used for nearly all kind of applications.

Features and benefits

- Available in a wide range of materials and sizes
- High tensile strength with very low insertion force
- Only high quality plastic is used meeting recycling targets
- Inside serrated cable ties for a strong hold onto bundles
- Ergonomic bent tail offers quick and simple installation
- Easy application either manually or with an application tool

Standard T-Series cable ties – for almost any type of application (PA66).

Material specifications: See Article-No. on our website.

Cable ties polyamide 6.6 standard

T-Series in PA66 coloured

Coloured T-Series cable ties are ideally suited for marking purposes. They can be used to secure and/or identify different kinds of bundles at the same time.

Features and benefits

- Available in a wide range of colours and sizes
- Strong cable tie to permanently mark or identify bundles
- Easy application either manually or with a processing tool
- Coloured T-Series cable ties provide an inside serration

T-Series cable ties – ideally suited for colour coding.

Material specifications: See Article-No. on our website.

Cable ties for outdoor use (UV-resistant)

T-Series in PA66W/UV black

These inside serrated cable ties are made of UV-resistant Polyamide 6.6 (PA66W) and thus suitable for outdoor applications. UV stabilised cable ties resist UV radiation for a considerably longer period compared to standard PA66 cable ties. They can easily be used for bundling and securing cables, pipes and hoses especially in outdoor areas.

Features and benefits

- UV-resistant black cable tie available in a wide range of sizes
- Made from 100 % high quality plastic, allows for good recycling
- Inside serration for a strong hold onto bundles
- Easy application either manually or with a processing tool
- Simple to insert due to bent tail

UV-resistant T-Series cable ties (PA66W/UV).

Specific part numbers according to EN45545 available on request.

Cable ties for temperatures up to + 105 °C (heat stabilised)

T-Series in PA66HS natural and black

These inside serrated cable ties are made from heat stabilised Polyamide 6.6 (PA66HS). They can be applied in environments with continuous temperatures up to +105 °C. T-Series cable ties can be easily installed by hand or using an application tool to ensure consistency of installation.

Features and benefits

- Heat stabilised cable ties (PA66HS) for temperatures up to +105 °C
- Available in a wide range of sizes to cover almost every application
- Inside serration provides a strong hold onto bundles
- Manual and/or pneumatic tools available for greater process reliability
- Commonly offered in natural and black, other colours available on request

Heat stabilised T-Series cable ties up to +105 °C.

Cable ties for higher impact resistant polyamide 6.6 ScanBlack

T-Series in PA66HIR(S) black

Impact resistant T-Series cable ties are manufactured from PA66HIR(S) – an impact modified material formulation. This high performance material offers limited brittleness sensitivity and a higher flexibility even at low temperatures. PA66HIR(S) cable ties meet increasing requirements like in the chemical, medical and/or automotive industry.

Features and benefits

- Impact resistant cable tie in black colour
- For bundling and securing cables, pipes and hoses
- Available in different sizes
- Higher flexibility especially in cold environments
- Limited brittleness sensitivity

Impact resistant T-Series cable tie (PA66HIR(S)).

Cable ties made from post-industrial recycled polyamide 6.6

T-Series in PA66HIRHS(REC) black

T-Series cable ties are ideal for bundling and securing cables, pipes and hoses. These cable ties can be used for nearly all kinds of applications, offering high performance along good thermal resistance. PIR range gives you the choice to make a sustainable difference in your cable management without compromising on performance.

Features and benefits

- Manufactured from Post Industrial Recycled (PIR) PA66
- Heat stabilised, impact modified material
- High tensile strength with very low insertion force
- Inside serrated cable ties for a strong hold onto bundles
- Ergonomic bent tail offers quick and simple installation
- Easy application either manually or with an application tool

T-Series cable ties made from post-industrial recycled PA66 – heat stabilised and impact modified.

Cable ties for higher fire-protection

T-Series in PA66V0 white

T-Series cable ties for bundling and securing cables, pipes and hoses. These cable ties can be used for almost any type of application especially where safety regulations are high and the reduction of smoke and dangerous gases is required. PA66V0 products are most critically used within public sector areas – particularly in the rail, construction and defence industry.

Features and benefits

- White cable tie for higher fire-protection
- Conform to low smoke generation requirements (UL94 V0)
- Low evolution of toxic gases and corrosive acids in event of a fire
- PA66V0 cable ties are available in different sizes
- High safety rating due to low fire hazard

Flame retardant cable tie made from PA66V0 material.

Material specifications: See Article-No. on our website.

Cable ties for temperatures up to +150 °C (5000 h) in polyamide 4.6

T-Series in PA46 natural and grey

These inside serrated cable ties are made from Polyamide 4.6 (PA46). They can be applied in environments with temperatures up to +195 °C (for 500 hours) which makes them suitable for applications where a broader temperature range is required. Polyamide 4.6 is a well known material in the automotive, railway or white goods area. An application tool is recommended to ensure greater process reliability while installing cable ties.

Features and benefits

- Cable tie for high temperature applications up to +150 °C (5000 h) and +195 °C (500 h)
- Available in different sizes to cover various bundle diameters
- Low smoke generation in the event of a fire
- PA46 is a moisture sensitive material
- Inside serrated cable tie offers strong hold around bundles
- Easy application either manually or with an application tool

T-Series cable ties – higher temperature resistance up to +150 °C for 5000 hours (PA46).

Cable ties for higher chemical resistance and temperatures of -80° to +170 °C

T-Series in E/TFE (Tefzel®) blue

E/TFE or Tefzel® cable ties are used when higher chemical resistance and/or temperatures up to +170 °C are required. These ties are most likely chosen for challenging applications in industries like food and beverage, aerospace, automotive or railway.

Features and benefits

- Blue cable tie offering high chemical resistance
- Suitable for applications with temperatures of -80° to +170 °C
- Resistant to radioactivity and UV light
- E/TFE is a non hydroscopic material, no moisture absorption
- Complying with UL94 V0 requirements

T-Series E/TFE cable ties – for higher chemical resistance up to +170 °C.

Material specifications: See Article-No. on our website.

All dimensions in mm. Subject to technical changes. Minimum Order Quantity (MOQ) may differ from package content. Other packaging options may also be available. General linguistic usage for cable ties made from raw material E/TFE is Tefzel®-Tie. In addition to Tefzel® from DuPont HellermannTyton also uses equivalent E/TFE raw material from other suppliers. N = Minimum Loop Tensile Strength for Cable Ties (newton)

Please note: Some or all of the products listed here have these approvals, or have one or more sustainable attributes. Please see our website for the latest details.

Polypropylene cable ties for higher chemical resistance and temperatures up to +115 °C

T-Series in PP natural and black

T-Series cable ties made from Polypropylene (PP) are less hydroscopic and offer a higher chemical resistance and temperature range compared to a standard Polyamide 6.6 (PA66) material. Cable ties from Polypropylene can withstand continuous operating temperatures up to +115 °C. These cable ties are used to bundle and secure cables, pipes and/or hoses.

Features and benefits

- Polypropylene cable ties for higher chemical resistance
- Can withstand continuous operating temperatures up to +115 °C
- Different sizes available in black and natural colour
- Due to its low density PP cable ties can float on water
- Less hydroscopic material, almost no water absorption
- Polypropylene is a lightweight material due to its density
- The production of polypropylene generally requires less energy compared to other plastics

T-Series cable ties for higher chemical resistance and temperatures up to +115 °C (PP).

Material specifications: See Article-No. on our website.

Cable ties made from sustainable bioplastic

T-Series in PA11 black

T-Series cable ties manufactured from PA11 have many technical features making them suitable for use in a variety of applications to fix and support cables, pipes and other elements. They offer an excellent resistance to chemicals in most challenging environments like offshore or on oil rigs and construction vehicles. In addition the very good UV resistance makes it a perfect choice for solar panel cable installations.

Features and benefits

- Made of Polyamide 11 – a sustainable bioplastic from vegetable oil
- Very good UV resistance and durability in outdoor applications
- Stable technical performance even at very low temperatures
- High resistance to chemicals including chlorides
- Low water absorption rate offers consistent technical performance

A sustainable T-Series cable tie with high resistance to chemicals and UV light.

Material specifications: See Article-No. on our website.

Cable ties in-between size to T-Series

LK-Series

For bundling and securing cables, pipes, hoses and other elements. These cable ties can be used for a countless number of applications. The LK-Series is similar to T-Series but offers in-between sizes to fit individual customer needs.

Features and benefits

- Inside serrated cable ties for a strong hold around bundles
- Various materials and sizes are available
- High tensile strength with very low insertion force
- Easy application either manually or with an application tool

LK-Series – in-between size to T-Series.

Material specifications: See Article-No. on our website.

All dimensions in mm. Subject to technical changes. Minimum Order Quantity (MOQ) may differ from package content. Other packaging options may also be available. N = Minimum Loop Tensile Strength for Cable Ties (newton)

Please note: Some or all of the products listed here have these approvals, or have one or more sustainable attributes. Please see our website for the latest details.

Cable ties for high temperature applications up to +240 °C

PEEK Ties, inside serrated

PEEK Ties have been designed for use in hazardous environments. Their suitability for high temperature applications makes them ideal for use in the drilling industry, railway, offshore or automotive industry. The excellent chemical and radium ray resistance is predestined for applications in medical engineering, chemical industry and power stations. Within the aerospace industry, PEEK ties are suitable due to their good ratio weight to tensile strength. Because of this combination of different properties, PEEK ties can replace metal solutions.

Features and benefits

- For high temperature applications from -55 °C up to +240 °C
- Close fit to the cable bundle due to the deepening head shape
- Easy insertion combined with high tensile strength
- Takes up less space due to curved head design
- Combines the performance of a metal tie with the ease of use of a polyamide cable tie
- Manual and/or pneumatic tools available for greater process reliability

The PEEK cable tie PT220 for high temperature applications.

Material specifications: See Article-No. on our website.

Cable ties with smart design

X-Series

The X-Series range of cable ties provides a new and improved design compared with standard cable ties, delivering a range of benefits and enhanced performance. With a new streamlined design and smaller head, the X-Series cable ties provide a superior fixing solution for tight applications, whilst also benefiting from a better grip around the bundle. This professional cable tie range is available in weather resistant and high impact / heat stabilised materials, ensuring these fixings consistently perform well both at high temperatures and in cold environments.

Features and benefits

- Inside serrated cable tie
- High tensile strength around cable bundles
- Smooth, rounded head design
- Space saving solution
- Improved ergonomic design
- Provides a secure fastening with no lateral movement

X-Series provides a superior fixing solution for tight applications.

Material specifications: See Article-No. on our website.

Cable ties for hose and gaiter

CTT-Series natural and black

CTT is designed to secure pipes, hoses and gaiters where low pressures are being secured. These ties can be used in many different industries including automotive, white goods manufacturing, medical industry and construction.

Features and benefits

- Curved head design offers a good fit to the bundle
- Inside serration for a strong hold onto bundles
- Easy application either manually or with a processing tool

CTT ties installed on flexible gaiters.

For secure fixing of round and solid shapes.

Cable ties for parallel routing

DH-Series

Double loop head ties are ideal for separation of two cable runs without the need for additional cable ties. Additionally these ties are widely used within the packaging industry. The first loop closes and secures the bag whilst the second loop can be made into a carrying handle (subject to weight).

Features and benefits

- Possibility to separate bundles with only one cable tie
- Cable tie with two heads creating an inside and outside serrated loop
- Available in a wide range of materials
- Bundles can be of different diameter
- Maximum bundle diameter is a maximum combined bundle
- Easy application either manually or with a processing tool

DH-Series cable ties for parallel routing.

Material specifications: See Article-No. on our website.

Cable ties for food industry, detectable

MCT-Series

The Metal Content Tie is a cable tie specifically designed for use in the food and pharmaceutical processing industries. A unique manufacturing process, involving the inclusion of a metallic pigment, enables even small 'cut-off' sections of the tie to be detected by standard metal-detecting equipment. Ideally suited for the installation of cabling in and around the manufacturing process.

Features and benefits

- Total metal dispersion throughout the tie
- Can support quality assurance in the production of food stuffs, for example HACCP
- Blue colour for easy visual detection
- Greatly reduces risk of contamination
- Metal detectable (detection level depending on specific application and equipment)

Our detectable MCT(S) cable ties are used in the food and pharmaceutical industry.

Material specifications: See Article-No. on our website.

Cable ties for food industry, detectable

MCTS-Series, corrosion resistant

Our MCTS cable ties have been specifically developed to be used in the food and beverage as well as in the pharmaceutical industry. A unique manufacturing process in combination with a unique material formulation is offering outstanding performance in line with high corrosion resistance. This makes the MCTS an ideal product even for very humid environments. In addition the MCTS ties manufactured from a polypropylene base material are offering very good chemical resistance.

Features and benefits

- Total metal dispersion throughout the tie
- Can support quality assurance in the production of food stuffs, for example HACCP
- Blue colour for easy visual detection
- Greatly reduces risk of contamination
- Metal detectable (detection level depending on specific application and equipment)
- MCTS ties have very good corrosion resistance

Our detectable MCT(S) cable ties are used in the food and pharmaceutical industry.

Cable ties for thin-walled bundles

OS-Series

OS-Series cable ties are used in many areas where thin-walled or soft insulation wires and cable are being installed, for instance automotive and electrical industry.

Features and benefits

- Outside serrated cable tie with smooth surface to the bundle
- Tie follows the contours of the cable bundle perfectly
- Takes up less space due to curved head design
- Easy insertion combined with high tensile strength
- PA46 material for higher temperatures up to +195 °C (500 h)
- PA66V0 cable ties fulfill Limited Fire Hazard requirements
- Easy application either manually or with a processing tool

Outside serrated OS-Series cable tie with smooth surface to the bundle.

Material specifications: See Article-No. on our website.

Cable ties made from post-industrial recycled polyamide 6.6

OS-Series in PA66HIRHS(REC) black

OS-Series cable ties deliver high performance with resistance to abrasion, petrol and oil. Made from a more sustainable, durable polymer that requires no moisture conditioning, they are ideal for a wide range of workflows and applications even in tough conditions and demanding environments.

Features and benefits

- Manufactured from Post Industrial Recycled (PIR) PA66
- Heat stabilised, impact modified material
- Easy insertion combined with high tensile strength
- Outside serrated cable tie with smooth surface to the bundle
- Tie follows the contours of the cable bundle perfectly
- Takes up less space due to curved head design
- Easy application either manually or with a processing tool

OS-Series cable ties made from post-industrial recycled PA66 – heat stabilised and impact modified.

Cable ties for thin-walled bundles

S-Series, Polypropylene (PP)

S-Series cable ties made from Polypropylene (PP) are non hydroscopic, offer a higher chemical resistance and reduced CO₂ footprint compared to a standard cable tie material. These cable ties are used to bundle and secure cables, pipes and/or hoses.

Features and benefits

- The S50ROS features a significantly lower CO₂ footprint compared to cable ties made of standard material, in line with sustainability goals in various industries
- The outside serration design ensures gentle handling of sensitive cables and bundles, reducing the risk of damage during installation and maintenance
- With an anti-slip feature on the inside, the S50ROS prevents undesired lateral movement of cables and bundles, maintaining tidy and organized cable management within vehicles
- Resistant to various chemicals including salt and acid, the S50ROS is ideal for automotive applications where exposure to harsh environments is common, ensuring long-lasting performance and reliability

S-Series cable ties provide more sustainable and reliable bundling in harsh environments.

Cable ties for high temperature applications up to +240 °C

PEEK Ties, outside serrated

PEEK Ties have been designed for use in hazardous environments. Their suitability for high temperature applications makes them ideal for use in the drilling industry, railway, offshore or automotive industry. The excellent chemical and radium ray resistance is predestined for applications in medical engineering, chemical industry and power stations. Within the aerospace industry, PEEK ties are suitable due to their good ratio weight to tensile strength. Because of this combination of different properties, PEEK ties can replace metal solutions.

Features and benefits

- For high temperature applications from -55 °C up to +240 °C
- Outside serrated cable tie with smooth surface to the bundle
- Close fit to the cable bundle due to the deepening head shape
- Easy insertion combined with high tensile strength
- Takes up less space due to curved head design
- Combines the performance of a metal tie with the ease of use of a polyamide cable tie
- Manual and/or pneumatic tools available for greater process reliability

Outside serrated Cable Tie and Identification tag HFTP48 made from Peek.

A clearly better way of identifying cables and pipes with HFTP PEEK tags.

Material specifications: See Article-No. on our website.

Cable ties with 90° angled head

V-Series

Due to its low profile head, V-Series outside serrated cable ties are perfectly suited for applications with restricted space, such as camera, alarm and automation systems (Remote I/O Systems). Where bundles are fed through a grommet or ductwork, V-Series provides a practical solution due to its unique rounded design.

Features and benefits

- Outside serrated cable tie with smooth surface to the bundle
- The 90° angled head perfectly fits onto the bundle
- Rounded head design minimises the risk of damage to insulation, especially of parallel routed bundles
- Low profile head takes up less space above the bundle
- Easy insertion and high tensile strength
- Easy application either manually or with a processing tool

V-Series is perfect for parallel bundles.

Material specifications: See Article-No. on our website.

Cable ties with low profile head

PE-Series

These ties are particularly useful in areas with restricted space. The low profile design ensures that nothing snags on the heads. Coloured low profile cable ties are ideal for securing foam padding to playground equipment or as a simple means of identifying equipment.

Features and benefits

- Outside serrated cable tie with a smooth surface to the bundle
- Coloured cable ties can be used for identification
- Broad contact area with the bundle minimises risk of damage
- Low profile head for ideal use in restricted spaces
- Parallel entry for optimal fit around circular bundles

PE400SH-Series - low head profile cable ties for secure fastening and identification in narrow spaces.

Cable ties with low profile head

LPH-Series

LPH cable ties are made of Polyamide 6.6 materials. The design with its serration on the outside provides a smooth surface to the bundle. Any damage to the insulation can be avoided. The flat head is ideal in areas with restricted space. They are mainly used within the electrical industry but the tough design is perfectly suited to a variety of indoor and outdoor applications.

Features and benefits

- High impact modified cable ties are also available
- Good tensile strength with a single – or a double bridged head
- Outside serration allows for a smooth surface to the bundle
- Design protects against damage to cable insulation
- Low profile head for optimised use especially in restricted spaces
- Strap is threaded parallel through the low profile head

Cable ties with low profile head

SPH-Series

The low profile head cable ties from the SPH-Series meet a wide range of needs. They can be installed both indoors and outdoors, thanks to their UV resistance. They are particularly valued for cable tray installations as well as in the construction sector. These ties are also increasingly used in industrial applications.

Features and benefits

- Made from a blend of post-industrial and post-consumer recycled PA66
- Excellent UV resistance for long-term outdoor use (20 years)
- Outside serration design with an anti-slip feature on the inside to prevent lateral movement of sensitive cables and bundles
- Low profile head, ideal for use in narrow spaces
- Low insertion force enables quick, tool-free manual installation
- Pre-locking position supports secure placement before final installation
- Installer-friendly packaging: belt clip and multiple openings

Application of SPH-Series cable tie with LOK02.

Cable ties for strong hold on smooth bundles

Soft Grip-Series

Soft Grip cable ties are 2-component or “twin-shot” ties (that combine PA66HS with a soft TPE inner layer). It is designed for the flexible and easy bundling and fastening of smooth and sensitive bundles, such as pipes in vehicle fluid management applications. It has a pre-locking feature and can also be re-opened with a screwdriver. Soft Grip cable ties can be used in combination with specially developed mounts with standardised tie head retention and customisable footparts.

Features and benefits

- 2-component cable tie (PA66HS and TPE) assures high protection of sensitive harnesses and fluid system tubes
- Soft TPE inner layer inhibits lateral movements on the bundle, especially on smooth tubing
- Pre-locking feature holds the cable tie in place before it is tensioned
- Soft Grip cable tie can be removed with a screwdriver for maintenance
- EVO9 SG application tool with adjusted nose piece available

Soft Grip Cable Ties (2-component cable ties).

Cable tie locked by glass fibre pin

KR-Series, 1-Piece

This cable tie is distinguished by its smooth strap and unique locking mechanism. The chamfered head of the KR-Series allows for a firm fit around the bundled element. Due to its special design KR-Series cable ties can be used as a safety method to bundle any cable and to also secure bellows on steering racks, water hoses or vacuum lines. The endless strap version is fairly flexible and can be cut to any length required. Separate heads are available to fix the strap.

Features and benefits

- Cable tie without serration to avoid any damage to cables
- Strap is locked into place with a glass-fibre reinforced pin
- Very secure and vibration resistant fixing
- Available in various materials, colours and almost every length
- Cable ties from PA12 are highly resistant to chemicals, impact and UV light
- KR-ties up to 426 mm are made as one piece
- For assembly a special KR-tool is needed

KR-Series ties applied on a cable tray.

The unlocked head (yellow) of a KR-tie.

The cable tie (red) is locked into place with the pin.

Material specifications: See Article-No. on our website.

Endless cable ties with separate head and spacer

EL-TY-Series

These robust cable ties are particularly suitable for use with larger diameter cables, pipes and hoses. Designed originally for securing overhead catenary and cables, they are now used in many industries from the building sector, through to the chemical industry, to the installation of signs for traffic management. Separate spacers allow for a defined distance when bundling in parallel.

Features and benefits

- Made of very strong Polyacetal (POM)
- System consists of endless strap, spacers and heads
- Head includes stainless steel pawls for a proper fixation
- Very secure fixing and good resistance to ageing and UV light
- Suits any bundle diameter and reduces inventory

EL-TY straps can be cut to suit any bundle.

Material specifications: See Article-No. on our website.

Cable ties inside serrated

RELK-Series up to 200 N loop tensile strength

Used in a wide range of industries these releasable and reusable ties are ideal where changes are anticipated. This includes temporary installation and the addition or removal of elements. These releasable cable ties are commonly used to fix stage equipment, for cable management at outdoor events or prototype harnessing work. The extended pawl is simply pushed down with a finger to release the strap.

Features and benefits

- Releasable and reusable cable tie
- Available in black and natural colour
- Extended trigger for simple and quick release of ties
- RELK cable ties are inside serrated
- Different lengths are available

Material specifications: See Article-No. on our website.

RELK releasable cable ties for temporary bundling.

Cable ties inside serrated, releasable

RLT-Series up to 670 N loop tensile strength

Used in a wide range of industries these releasable and reusable ties are ideal where changes are anticipated. This includes temporary installation and the addition or removal of elements. These releasable cable ties are commonly used to fix stage equipment, for cable management at outdoor events or prototype harnessing work. The extended pawl is simply pushed down with a finger to release the strap.

Features and benefits

- Releasable and reusable cable tie
- Multiple grades of PA66 for indoors, outdoors or at high temperatures
- Available in black and natural colour
- Extended trigger for simple and quick release of ties
- Inside serrated cable tie
- Different lengths available

The RELK and RLT cable ties can be re-opened and re-used.

The closure function of the reopenable cable tie from the RLT-series.

Material specifications: See Article-No. on our website.

RELK-, RLT-Series

All dimensions in mm. Subject to technical changes. Minimum Order Quantity (MOQ) may differ from package content. Other packaging options may also be available. N = Minimum Loop Tensile Strength for Cable Ties (newton)

Please note: Some or all of the products listed here have these approvals, or have one or more sustainable attributes. Please see our website for the latest details.

Cable ties inside serrated with tuckaway

RT250-Series up to 1115 N loop tensile strength

The RT250 is a releasable cable tie. Due to its minimum loop tensile strength of 1,115 N the cable tie is perfectly suited to fix larger and/or heavier bundles. RT250 can be opened and reused. UV-resistant cable ties manufactured from PA66W are recommended for outdoor applications. For shorter lengths REL250-Series can be offered.

Features and benefits

- Releasable and reusable cable tie
- Suitable for larger and/or heavier bundles
- Eyelet allows excess tail to be tucked neatly away
- Available in black and natural colour
- Extended trigger for simple and quick release of ties
- Protected trigger to avoid accidental release
- RT250 cable ties are inside serrated

Ideal for larger or heavier bundles these ties can be opened and reused.

The closure function of the reopenable cable tie from the RT250-series.

Material specifications: See Article-No. on our website.

RT250-Series

Cable ties inside serrated with kickdown lever

REL-Series

The REL-Series is ideally used in applications where changes are anticipated and a tie needs to be opened and closed repeatedly. The release mechanism of an REL cable tie allows simple and quick opening with only one hand. UV resistant cable ties manufactured from PA66W are recommended for outdoor applications.

Features and benefits

- Releasable and reusable cable tie for medium-weight loads
- Extremely easy-to-operate release mechanism
- Opens simply and quickly with only one hand
- Also available in PA66W for outdoor applications
- REL cable ties have their serration on the inside

Releasable and reusable cable tie, REL-Series.

Material specifications: See Article-No. on our website.

Cable ties outside serrated for marking, releasable

LR55-Series

Releasable cable ties of our LR55-Series offer some extra benefits. Their serration is on the outside of the cable tie. This will minimise the risk of damage to cables or other elements. Additionally LR55 cable ties are available in different colours – optimally suited for temporary identification within logistic, packaging, cable harness production or for testing purposes. The strap is released when pushing the extended pawl upwards. The risk of opening the cable tie accidentally is minimised.

Features and benefits

- Releasable and reusable cable tie
- Various colours for applications needing colour coding
- Extended trigger for simple and quick release of ties
- Risk of accidental release is minimised
- Outside serration prevents damage to cable insulation

Releasable and outside serrated LR55 cable ties are ideal suited for colour coding.

Material specifications: See Article-No. on our website.

Cable tie outside serrated with lever lock

ORF-Series up to 135 N loop tensile strength

The ORF-Series with lever lock has been designed for easy removal and reuse without a knife or side cutter, but conveniently with a lever. The outside serration minimises the risk of damage to cables and other elements.

Features and benefits

- Designed for easy release with one-hand
- Suitable for temporary colour coding
- Gentle on the bundled material thanks to outside serration

Material specifications: See Article-No. on our website.

Cable ties without serration in flexible TPU

SRT-Series for industry quantities

The soft, flexible material makes these ties particularly suitable for use on sensitive wires, for instance fibre-optic cables. Additionally they are suitable for moving elements and vibrating applications. The double slotted head allows for parallel bundling.

Features and benefits

- Elastic and flexible cable ties with rounded and smooth edges
- Releasable and reusable
- Double slotted head with fixation pawl
- Flexibility ensures steady and evenly distributed pressure
- Tight fixation even in vertical position: prevent sliding down or loosening bundle
- Suitable for moving elements and vibrating applications like windmills, machines, robotics, pulsating tubing and conduits
- Ideal use for temporarily fixation for presentations, concerts, theatres, exhibitions
- Long lifetime when used indoor
- Remains flexible even at cold temperatures (-20 °C)

The elasticity of the SOFTIX ties makes them suitable for use in many applications.

The closure function of the reopenable cable tie from the Softfix-series.

Material specifications: See Article-No. on our website.

Cable ties inside serrated with one-hand release mechanism

REZ-Series

Thanks to its innovative head design, the REZ-Series cable ties can be released using only two fingers. By applying pressure to the integrated wings, the tie can be quickly and securely disengaged without damage. The REZ cable tie provides a reliable and reusable fastening solution suitable for a wide range of applications, especially in temporary setups and areas with limited accessibility.

Features and benefits

- REZ-Series can be released and reused
- Unique head design for simple and rapid use
- Quick-release mechanism for one-hand operation
- Cable tie can be opened even when under tension
- Can still be released when working with gloves

Material specifications: See Article-No. on our website.

Cable ties for food industry, detectable, reusable

MCT-Series releasable

The Metal Content Tie is a cable tie specifically designed for use in the food and pharmaceutical processing industries. A unique manufacturing process, involving the inclusion of a metallic pigment, enables even small 'cut-off' sections of the tie to be detected by standard metal-detecting equipment. Ideally suited for the installation of cabling in and around the manufacturing process. The MCTRELK ties do have a releasable function thus they can be reopened and reused.

Features and benefits

- Total metal dispersion throughout the tie
- Can be reopened and reused
- Supports quality processes around the production of food stuffs
- Blue colour most common for easy visual detection
- Greatly reduces risk of contamination
- Metal detectable (detection level depending on specific application)

Detectable and reusable Cable Ties for temporary closure.

The closure function of the detectable and reusable cable ties.

Material specifications: See Article-No. on our website.

Can support quality assurance in the production of food stuffs, for example HACCP.

MCT-Series

TYPE	Width (W)	Length (L)	Bundle Ø max.	N	Material	Colour	Pack Cont.	Article-No.
MCTRELK2M	4.6	250.0	65.0	225	PA66MD	Blue (BU)	100 pcs.	111-00937

Recommended Tools: 1=MK10-SB, 2=MK20, 4=MK3PNSP2, 5=EVO7i, 25=EVOcut. For more information on toolings please refer to the Application Tooling chapter on page 593.

All dimensions in mm. Subject to technical changes. Minimum Order Quantity (MOQ) may differ from package content. Other packaging options may also be available. N = Minimum Loop Tensile Strength for Cable Ties (newton)

Please note: Some or all of the products listed here have these approvals, or have one or more sustainable attributes. Please see our website for the latest details.

Cable ties with quick release mechanism, parallel bundling

SpeedyTie

The versatility of the SpeedyTie means that it is suitable for a multitude of applications like electro installations, heating and ventilation, construction, exhibitions and trade fairs. Whether it is used for permanent or temporarily solutions the SpeedyTie is a very strong helping hand in every situation.

Features and benefits

- Releasable and reusable cable tie
- Bears loads of up to 888 N (approx. 90 kg)
- 750 mm long for use in a wide variety of applications
- Can be used for parallel bundling
- Easy to handle when wearing work gloves
- Available in signal yellow and in black

Excess Tails can be neatly tucked away.

The closure function of the reopenable cable tie from the SpeedyTie-series.

Material specifications: See Article-No. on our website.

SpeedyTie®

TYPE	Width (W)	Length (L)	Bundle Ø max.	N	Material	Colour	Pack Cont.	Article-No.
SpeedyTie (RTT750HR)	13.0	752.0	210.0	888	PA66	Yellow (YE), Red (RD)	5 pcs.	115-00001

Please note: Some or all of the products listed here have these approvals, or have one or more sustainable attributes. Please see our website for the latest details.

Hook and loop ties

TEXTIE-Series

The TEXTIE-Series offers a soft bundling method and is ideal for use on telephone cables, optical fibre and network cables. These cable ties can be reopened and reused up to 400 times. A perfect solution for temporary installations and cable management for stage equipment, at outdoor events or for prototype harnessing. Also suitable for use in private or office applications. TEXTIE cable ties are available in various colours and can be used to colour-code cables and/or wires.

Features and benefits

- Quick and simple to use without tools
- Reusable up to 400 times
- Various colours for easy identification
- For indoor and outdoor use
- Can be attached to the bundle permanently
- Resistant to ageing, no corrosion

Material specifications: See Article-No. on our website.

Due to the functional cable tie design the TEXTIE is fixed on the cable and can't get lost.

The TEXTIE-Series is available in different colours and lengths.

The closure function of the reopenable cable tie from the TextTie-series.

Metal Ball Locking Cable Tie MBT-Series

A highly innovative solution from HellermannTyton

MBT series cable ties

Made of stainless steel grade 304 or 316L, the MBT range of cable ties has no serrations on the strap and is threaded parallel through the head, gliding under a metal ball-bearing locking mechanism. By using an appropriate application tool like our MK9SST the cable tie is easily and quickly tensioned, with the strap cut to a flush finish.

Locking technology

The strap is locked into the head via a ball bearing. The ball locks into the small end of the wedged shaped housing, forming a positive lock with strap.

For rigid objects such as metal pipes, we would recommend our protective channelling (LFPC) to be laid between the bundled object and tie strap. This not only provides protection against galvanic corrosion, but also ensures a better engagement with the bundle. The MBT locking technology keep the minimum tensile strength of up to 7,000 Newtons and standard strap lengths of up to 1.5 m.

1. Initial position, ball bearing moves freely. A: Cable tie (inserting)

2. Ball rebounds and wedges tie in place. A: Cable tie (tightening) B: Ball (wedged)

Locking Mechanism for Metal Cable Ties								
PRODUCT TYPE NAME	Type Name Meaning	Material Cable Tie	Material Coating	Punch-lock	Fold-lock	Ball-lock	Tensioning tools	Special feature
MBT	Metal Ball Ties	SS304, SS316L	-	-	-	Yes	≤ 12.3 mm KST-STG200 ≤ 16.0 mm MK9SST HDT16 ≤ 16.0 mm MK9PSST	Closed head for higher tensile strength, Fork end for easy assembly

SCT – Short circuit test

The perfect alternative to cable cleats

Short Circuit Test (SCT)

MBT and AMT metal cable ties

Testobjects: Stainless steel cable ties from HellermannTyton

Productseries: MBT-, MBTXHD-, MBTUHD-Cable ties

HellermannTyton's single and double wrap Metal Ball (MBT) and Buckle Ties (AMT) fully withstand the maximum force of short circuits in trefoil formation according to the results of laboratory tests performed using the parameters outlined in the IEC 61914 cable cleat standard.

The tests conducted by the NEFI High Power Laboratory in Norway – a member of the Scandinavian Association for Testing of Electric Power Equipment (SATS) – demonstrated that our MBT and AMT stainless steel cable ties resist the huge forces unleashed by power cables in the event of a short circuit, even when they are installed in a 'worst case' trefoil formation scenario (see drawing below).

Construction of the HellermannTyton SCT

The MBT and AMT metal ties were insulated from the cable jackets with LFPC polyolefin protective channels as an added layer of protection.

Two different cable sizes, Ø 36 mm (300 mm²) and Ø 13 mm (50 mm²), each with 3 cables 8 m in length in trefoil formation, were tested with short circuit times between 0.2 and 0.5 seconds at various current levels with peak currents from 25,9 kA up to 77,8 kA.

Best practice for installation in trefoil formation. Ties should be bundled as closely as possible to the cables for a smooth loop and to avoid sharp edges.

Stainless steel metal ball cable ties mounted on a cable tray.

Results of the HellermannTyton SCT

- We ensure that our single and double wrap Metal Ball (MBT) and Buckle Ties (AMT) withstand a short circuit application
- We provide a viable fixing solution for low voltage cables
- We offer an cost-effective alternative to cable cleats

Advantages of using HellermannTyton stainless steel cable ties over cable cleats:

- Suitable for indoor and outdoor environments
- Very good heat and chemical resistance
- Due to the range of strap lengths and widths it is easy to choose a solution for every application
- Only one cable tie for many different cable diameters
- Lower installation costs
- Low inventory value and quicker installation time

Conclusion

- With the SCT we have proven that our MBT and AMT cable ties are suitable for low and medium voltage cable and withstand a defined level of short circuit currents.

The stainless steel cable ties from HellermannTyton are a time saving solution with a low price and low installation cost.

Please note that the information provided here is no substitute for a suitability test of your individual application.

$$F_t = 0.17 \times i_p^2 / S$$

Formula for calculating maximum force on conductors according to IEC 61914.

Cable ties with ball-lock

MBT-Series, stainless steel 304

Metal ties are ideal for all applications that require high strength, reliability and fire resistance. The MBT range of stainless steel cable ties can be used in chemical industries and on oil platforms as well as in mass transit, shipbuilding and mining industries. MBT ties are also suitable for machine building, construction and in the outside area of radio technology. Additionally MBT ties are ideal for securing lighting in theatres and exhibition halls.

Features and benefits

- Cable ties MBT, made from stainless steel 304
- Non-releasable locking feature
- Corrosion resistant
- Weather resistant
- Outstanding chemical resistance
- High temperature resistant
- Non-burning

Stainless steel cable ties, uncoated, MBT_SS, MBT_HS.

Stainless Steel Cable Ties, uncoated, MBT_XHS.

Material specifications: See Article-No. on our website.

Can support quality assurance in the production of food stuffs, for example HACCP.

For hard, smooth surface applications, we recommend the use of our LFPC protective channels.

Double wrap cable ties with ball-lock

MBTXHD- / MBTUHD-Series, stainless steel 316L

The double wrap ties of the MBT-series are used in applications where a fixing requires an extraordinary high tensile strength.

Features and benefits

- Stainless steel MBT ties with double wrap operation
- Wraps around the bundle and passes through the head twice
- Very high tensile strength to carry enormous applied loads
- Head with two locking balls
- Resistant to arduous conditions and environments

Double wrap stainless steel cable ties, uncoated, MBT_UHD.

Material specifications: See Article-No. on our website.

Can support quality assurance in the production of food stuffs, for example HACCP.

For hard, smooth surface applications, we recommend the use of our LFPC protective channels.

Cable ties with ball-lock and coating

MBT-FC-Series, stainless steel 316L

The MBT range of stainless steel cable ties can be used in the most arduous of conditions or where the additional security, strength and fire resistance of a metal fixing is required. Used in all industries from mass transit, ship building, oil rigs, mining and chemical industry, theatres and exhibition halls. In the event of a fire, cables will remain securely held in place and will not fall to block emergency exits. Fully coated ties can also be used to avoid any reflection. An important consideration for instance in the defence industry.

Features and benefits

- Fully coated MBT, made from type 316L stainless steel with polyester coating
- Non-releasable locking feature
- Coated cable tie with smooth edges
- Comfortable handling and installation
- Eliminates contact corrosion between dissimilar materials during application

Stainless steel cable ties, coated, MBT_SFC, MBT_HFC.

For hard, smooth surface applications, we recommend the use of our LFPC protective channels.

Double wrap cable ties with ball-lock and coating

MBTUHDFC-Series, stainless steel 316L

The MBT range of stainless steel cable ties can be used in the most arduous of conditions or where the additional security, strength and fire resistance of a metal fixing is required. Used in all industries from mass transit, ship building, oil rigs, mining and chemical industry, theatres and exhibition halls. In the event of a fire, cables will remain securely held in place and will not fall to block emergency exits. Fully coated ties can also be used to avoid any reflection. An important consideration for instance in the defence industry.

Features and benefits

- MBT cable ties, made from stainless steel SS316L with a polyester coating
- Non-releasable locking feature
- Double wrap operation
- Corrosion resistant
- Weather resistant
- Outstanding chemical resistance
- High temperature resistant
- Non-burning

Stainless steel cable ties, coated, MBT_UHDFC.

For hard, smooth surface applications, we recommend the use of our LFPC protective channels.

Material specifications: See Article-No. on our website.

Cable ties with punch-locking mechanism

MST-Series, stainless steel 304

Stainless steel cable ties are designed for fixing loads and cables securely in hazardous industrial environments such as railway carriages, jet engines, inside power plants or on offshore drilling platforms, where exposure to extremes of weather, saltwater and temperature are common. The MST-Series tie with its new punch-locking mechanism is an excellent choice especially for environments which require high resistance to vibrations.

Features and benefits

- MST-Series cable ties are made from stainless steel 304
- No loosening after bundling
- Corrosion and weather resistant
- Significantly improved vibration resistance
- Outstanding chemical resistance
- Space saving solution
- Safe cut-off (no sharp edges)
- High temperature resistant
- Non-burning

Stainless Steel Cable Ties MST-Series.

Can support quality assurance in the production of food stuffs, for example HACCP.

Material specifications: See Article-No. on our website.

Cable ties with fold locking

MLT-Series, stainless steel 316L

The MLT range of stainless steel cable ties can be used in the most arduous of conditions or where the additional security, strength and fire resistance of a metal fixing is required. Used in all industries from mass transit, ship building, oil rigs, mining and chemical industry, theatres and exhibition halls. In the event of a fire, cables will remain securely held in place and will not fall to block emergency exits.

Features and benefits

- Releasable stainless steel buckle tie
- Heavy duty type in stainless steel 316L
- Can be re-opened and re-used
- Available also with polyester coating which prevents corrosion between dissimilar materials

MLT-Series. Releasable stainless steel buckle tie with and without coating.

Material specifications: See Article-No. on our website.

For hard, smooth surface applications, we recommend the use of our LFPC protective channels.

The closure function of the releasable cable tie from the MLT-series.

Protective channel for stainless steel ties

LFPC-Series

When used in conjunction with the MBT, MST, MLT and AMT range of stainless steel cable ties this channel gives the cable protection against chafing, vibration and shock. Ideal for use in arduous conditions such as those found on board ships, oil rigs or in nuclear power stations.

Features and benefits

- LFPC channel, manufactured from Polyolefin
- Works with MBT-, MST-, MLT- and AMT-Series
- Smooth surface protects bundle against chafing caused by vibrations and shocks
- Can be cut from roll to any length
- Halogenfree
- Flame retardant

Material specifications: See Article-No. on our website.

Cable tie MBTXH with LFPC Protective Channel.

The fire protection properties of the material relate to the test performed on defined test samples. This is a test under laboratory conditions and not directly transferable to the product made from this material.

Selection guide for fixing ties

Application	Arrowhead	Fir Tree Mount	Rivet Wall Plug	Screw Mount	EdgeClip	Weld Stud Mount
	•	•		•		
		•	•	•		
					•	
						•

Arrowhead

This fixing tie is based on an arrowhead offering high extraction forces. The arrowhead is securely in place when a click can be heard and felt by the user.

Arrowhead with disc

The disc minimises the ingress of dust, dirt and water. Furthermore a safe fixation inside the drill hole is assured that withstands pressure from various directions.

Arrowhead with supporting wings

Arrowhead fixings with supporting wings offer good and stable fixation in drilled holes. The supporting wings generate additional pressure to assure a firm and secure fixing while taking up any variation in panel thickness. These ties are also suitable in high vibration applications.

Arrowhead without supporting wings

The arrowhead design ensures good fixation and takes up minimal space.

Fir Tree Mount

Fir Tree Mounts can be pushed into pre-punched holes easily in panels or threaded, blind holes based on the low insertion forces. The design is ideally suited for a wide range of sheet thicknesses. The disc on top of the fir tree covers the hole and minimises the ingress of dust, dirt and water.

Weld Stud Mount

Many of the HellermannTyton weld stud mounts can easily be attached by hand ("soft push"). The design offers very low insertion forces that require no tools. The mounts can be removed by twisting to the left.

Weld Stud Fixings with lateral adjustment

The special oval shape of these mounts provides a 5 - 6 mm lateral adjustment to cater for any misalignment of the stud or incorrect positioning of ties on the cables. The bundle can therefore be moved when mounted.

EdgeClip

The EdgeClips are specifically designed to bundle and guide cable and wires on edges. Cost intensive drill holes for fixing are no longer required. EdgeClips are easily mounted by hand, the integrated metal clamp, securely keeping the clips on the edge.

EdgeClip twistable

Ideally suited for fixations where bundles need to be flexibly guided. These EdgeClips are available with facilities for 90° or 360° rotation.

Cable and Hose Attachment

Excellent solution for subsequent attachment of pipes and wires to installed tubes.

Heavy Duty Application

These sturdy fixing ties can withstand vibrations. They are easy to apply and give a secure alignment to the bundle. They provide high tightening torque via the metal bushing.

Two Piece Fixing Ties with Coupler

The Coupler is an article to connect two cable ties for parallel bundling of tubes, harnesses or cables. Its design enables the cable ties to rotate up to 90° and allows flexible installations.

1-piece fixing ties with arrowhead, with disc in the strap

for round holes

These fixing ties are ideal for use in many different industries, including automotive, aerospace, rail and panel building.

Features and benefits

- Easy to assemble without the need for a tool
- Arrowhead simply locks into place
- Disc adjusts tie for pressures from various directions and minimises access of dust and dirt
- Cable tie head always situated in defined position
- Bundle runs directly across fixing point
- Simple assembly due to tab at the end of the head

The 'tab' on the head of the tie makes it easy to locate and lift the head for assembly.

Material specifications: See Article-No. on our website.

T80RSFT

T80RSFT with flexible disc.

1-piece fixing ties with arrowhead, with disc

for round holes

With a diverse range of fixing possibilities these ties are ideal for use in many different industries, including automotive, aerospace, white goods manufacture and panel building. This fastening solution is used to secure cable harnesses. We offer a variety of panel thicknesses and hole sizes to suit all kinds of application.

Features and benefits

- Easy to install without the need for a tool
- Arrowhead simply locks into place
- Disc adjusts tie for pressures from various directions and minimises ingress of dust and dirt
- Cable tie head always situated in a defined position
- KSFT-types with specially rounded arrowhead minimise the assembly height

The disc at the head of the T50SOSSFT6.5E protects the bore against dirt and splashes.

Material specifications: See Article-No. on our website.

All dimensions in mm. Subject to technical changes.

2-piece fixing ties with arrowhead, with disc

for round holes

Primarily designed for fixing cable harnesses in the automotive industry, their simplicity and ease of use has resulted in these parts being used in other industries, for example aviation, switch gear and white goods manufacturing.

Features and benefits

- Pre-assembled 2-piece fixing tie with arrowhead foot part
- Cable tie head can be moved after bundling
- Easy to assemble without the need for a tool
- Arrowhead simply locks into place
- Disc adjusts tie for pressure from various directions and minimises access of dust and dirt

Being a two piece assembly allows the tie head to be located in the most convenient position.

Material specifications: See Article-No. on our website.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

2-piece fixing ties for strong hold on smooth bundles

with arrowhead, with disc, for round holes

Soft Grip mounts are especially designed for use with Soft Grip ties. The versatile combinations provide a variety of flexible fastening options for fluid management / cooling systems in vehicles. The Soft Grip Series is a unique semi-customised part solution and designed to save time, money and development effort. The foot parts of the mounts can be adjusted to individual customer requirements.

In the event of maintenance, the cable tie can be easily removed using a screwdriver. Only the cable tie then needs to be replaced, not the whole fixing element.

Features and benefits

- Suitable for a variety of fastening requirements thanks to different foot parts (for holes, for studs, for screw fixings)
- Soft Grip cable ties assure high protection of sensitive harnesses and fluid system tubes
- Soft TPE inner layer inhibits lateral movements of the bundle, especially on smooth tubing
- Pre-locking feature holds the cable tie in place before it is tensioned
- Soft Grip cable ties can be removed with a screwdriver for maintenance
- EVO9SG application tool with adjusted nose piece available

Soft Grip Cable Tie assembled with Soft Grip Mount for holes (arrowhead) and a hose for fluid management.

Soft Grip Cable Tie assembled with Soft Grip Mount for holes (arrowhead).

1-piece fixing ties for high temperature applications up to +240 °C

With arrowhead, with disc, for round holes

This fastening solution is especially suitable for high temperature areas like the engine bay or exhaust area. The outside serrated cable tie protects the insulation of cable bundles.

Features and benefits

- Easy to install without the need for a tool
- Arrowhead simply locks into place
- Disc adjusts tie for pressures from various directions and minimises access of dust, dirt and water
- Cable tie head always situated in a defined position
- Features Material PEEK
- -55 °C to +240 °C operating temperature
- Excellent resistance against chemicals and gamma radiation

One piece fixing tie with arrowhead, outside serrated.

1-piece fixing ties with arrowhead, with disc

for round holes, sealed

The parts are mainly used in the automotive industry. This fastening solution is used to secure cable harnesses e.g. in car doors. We offer a variety of panel thicknesses and hole sizes to suit all kinds of application. The seal protects the interior and surrounding cables among other things from splash water.

Features and benefits

- One-piece fixing ties with cellular rubber disc
- Especially suitable for door and tailgate harnesses used for car body applications
- Made from PA66 heat-stabilised material
- Cellular rubber disc minimises ingress of dust, dirt and splash water

The additional seal protects against the ingress of moisture.

Material specifications: See Article-No. on our website.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

1-piece fixing ties with arrowhead, with wings

for oval holes

With a diverse range of fixing possibilities are ideal for use in many different industries, including automotive, aerospace, white goods manufacture and panel building.

Features and benefits

- Easy to assemble without the need for a tool
- Cable tie head always situated in defined position
- Arrowhead simply locks into place
- Supporting legs provide a secure and firm fixing in areas where space is limited
- Versions for oval holes feature anti-twist protection

A wide range of arrowhead fixing ties which are suitable for different panel thicknesses and hole diameters.

Material specifications: See Article-No. on our website.

T80RFT6X12

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

2-piece fixing ties with arrowhead, with disc, for round holes

S50ROS series with fixing element

S-Series cable ties made from Polypropylene (PP) are non hydroscopic, offer a higher chemical resistance and reduced CO2 footprint compared to a standard cable tie material. These cable ties are used to bundle and secure cables, pipes and/or hoses.

Features and benefits

- Pre-assembled 2-piece fixing tie with arrowhead foot part
- Cable tie head can be moved after bundling
- Easy to assemble without the need for a tool
- Arrowhead simply locks into place
- Disc adjusts tie for pressure from various directions and minimises access of dust and dirt

S50ROS made from Polypropylene combined with our fir tree parts for round holes.

TYPE	Hole Ø (FH)	Panel Thickness	Width (W)	Length (L)	Bundle Ø max.	N	Material	Colour	Tools	Article-No.

Recommended Tools: 5=EVO7i. For more information on toolings please refer to the Application Tooling chapter on page 593.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

Please note: Some or all of the products listed here have these approvals, or have one or more sustainable attributes. Please see our website for the latest details.

2-piece fixing ties with arrowhead, with wings

for oval holes

Primarily designed for fixing cable harnesses in the automotive industry, their simplicity and ease of use has resulted in these parts being used in other industries, for example aviation, switch gear manufacturer, white goods manufacturer.

Features and benefits

- Pre-assembled 2-piece fixing tie with arrowhead foot part
- Cable tie head can be moved after bundling
- Easy to assemble without the need for a tool
- Arrowhead simply locks into place
- Versions for oval holes feature anti-twist protection

T50RFT6OVAL for oval holes 6.3 x 12.2 mm.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

1-piece fixing ties with arrowhead, with wings

for round holes, releasable

With a diverse range of fixing possibilities are ideal for use in many different industries, including automotive, aerospace and panel building.

Features and benefits

- Easy to assemble without the need for a tool
- Cable tie head always situated in defined position
- Arrowhead simply locks into place
- Supporting legs provide a secure and firm fixing in areas where space is limited
- Releasable and therefore reusable

A wide range of arrowhead fixing ties which are suitable for different panel thicknesses and hole diameters.

Material specifications: See Article-No. on our website.

1-piece fixing ties with arrowhead

without wings and disc, for round holes

The arrowhead design is usefull in areas with limited space.

Features and benefits

- Easy to assemble without the need for a tool
- Fixing tie with arrowhead without wings
- Arrowhead simply locks into place
- Cable tie head always situated in defined position

The arrowhead design allows these fixing ties to be used in areas with limited space.

Material specifications: See Article-No. on our website.

2-piece fixing ties with arrowhead, with disc

for round holes, for parallel routing

Primarily designed for fixing cable harnesses in the automotive industry their simplicity, and ease of use, has seen these parts used in everything from aircraft, to switch-gear, to washing machines.

Features and benefits

- Pre-assembled 2-piece fixing tie with arrowhead foot part
- Cable tie head can be moved after bundling
- Easy to assemble without the need for a tool
- Arrowhead simply locks into place

T50SOSDSFT6.5 for parallel routing.

1-piece fixing ties with fir tree, with disc, for round holes

Fir tree parts FT5

Primarily designed for fixing cable harnesses in the automotive industry, their simplicity and ease of use has resulted in these parts being used in other industries, for example aviation, switch gear and white goods manufacturing.

Features and benefits

- Cable tie head always situated in defined position
- Easy to assemble without the need for a tool
- Disc adjusts tie for pressure from various directions and minimises ingress of dust and dirt
- Fir tree foot part can be used for a variety of panel thicknesses
- Suitable for use within threaded holes
- Parts with an anti-slip engraving, such as the T30SOS-AS-FT5-E, to prevent the harness from slipping sideways

Fir tree foot parts can be used for a variety of panel thicknesses.

Material specifications: See Article-No. on our website.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

1-piece fixing ties with fir tree, with disc

for round holes, releasable

This fir tree design is ideal for use in thick panels and threaded, blind holes. The additional disc avoids the intrusion of dust and dirt.

Features and benefits

- Cable tie head always situated in defined position
- Easy to assemble without the need for a tool
- Disc adjusts tie for pressure from various directions and minimises access of dust and dirt
- Suitable for use within threaded holes
- Reusable - Less waste and less pollution of the environment

Ideal for use in deep panels and threaded, blind holes.

Material specifications: See Article-No. on our website.

1-piece fixing ties with fir tree, with disc, with stand-off, for round holes

With offset 12.5 and 25.0 mm

Features and benefits

- Bundling and fixing solution
- Ideal combination of materials and design
- Different positions of the fixing anchor are available to fit installation space

Designed for optimal spacing: the integrated stand-off in this 1-piece fixing tie ensures secure cable routing while preventing contact with surfaces, ideal for high-performance applications.

Material specifications: See Article-No. on our website.

2-piece fixing ties with fir tree, with disc, for round holes

Fir tree parts FT3

Primarily designed for fixing cable harnesses in the automotive industry their simplicity, and ease of use, has seen these parts used in everything from aircraft, to switch-gear, to washing machines.

Features and benefits

- Pre-assembled 2-piece fixing tie with fir tree foot part
- Cable tie head can be moved after bundling
- Easy to assemble without the need for a tool
- Disc adjusts tie for pressure from various directions and minimises access of dust and dirt
- Fir tree foot part can be used for a variety of panel thicknesses
- Suitable for use within threaded holes

These fir tree fixings can also be used in threaded, blind holes.

Material specifications: See Article-No. on our website.

2-Pieces Fixing Ties with Fir Tree, with cover

2-Pieces Fixing Ties with Fir Tree, with cover, for round holes

Primarily designed for fixing cable harnesses in the automotive industry, their simplicity and ease of use, has resulted in these parts being used in many industries, for example: aviation, switch gear manufacture and white goods.

Features and benefits

- Pre-assembled 2-piece fixing tie with fir tree foot part
- Cable tie head can be moved after bundling
- Easy to assemble without the need for a tool
- Disc adjusts tie for pressure from various directions and minimises access of dust, dirt and water
- Fir tree foot part can be used for a variety of panel thicknesses
- Suitable for use within threaded holes

Two piece fixing tie with fir tree for round holes and with side offset.

Material specifications: See Article-No. on our website.

TYPE	Hole Ø (FH)	Panel Thickness	Width (W)	Length (L)	Bundle Ø max.	N	Material	Colour	Article-No.
T50RSOC13.9FT6.5	6.1 - 6.9 M8 x 1.25 Threaded 6.1 - 6.6 (hexagonal)	0.7 - 3.0	4.6	202.0	45.0	225	PA66HIRHS	BK	156-03276

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

2-piece fixing ties for strong hold on smooth bundles

Fir tree parts FT6

Soft Grip mounts are especially designed for use with Soft Grip ties. The versatile combinations provide a variety of flexible fastening options for fluid management / cooling systems in vehicles. The Soft Grip Series is a unique semi-customised part solution and designed to save time, money and development effort. The foot parts of the mounts can be adjusted to individual customer requirements.

In the event of maintenance, the cable tie can be easily removed using a screwdriver. Only the cable tie then needs to be replaced, not the whole fixing element.

Features and benefits

- Suitable for a variety of fastening requirements thanks to different foot parts (for holes, for studs, for screw fixings)
- Soft Grip cable ties assure high protection of sensitive harnesses and fluid system tubes
- Soft TPE inner layer inhibits lateral movements of the bundle, especially on smooth tubing
- Pre-locking feature holds the cable tie in place before it is tensioned
- Soft Grip cable ties can be removed with a screwdriver for maintenance
- EVO9SG application tool with adjusted nose piece available

Soft Grip Cable Tie assembled with Soft Grip Mount for holes (arrowhead) and hoses for fluid management.

Material specifications: See Article-No. on our website.

SGT100SFT6.7

TYPE	Drawing	Hole Ø (FH)	Panel Thickness	Width (W)	Length (L)	Bundle Ø max.	Material	Colour	Tools	Article-No.
SGT100SFT6.7		6.3 - 7.0	0.6 - 4.2	12.7	140.0	25.4	PA66HS TPE PA66HIRHS	BK	8	156-03268

Recommended Tools: 8=EVO9SG. For more information on toolings please refer to the Application Tooling chapter on page 593.

All dimensions in mm. Subject to technical changes.

2-piece fixing ties with fir tree, with disc, for oval holes

S50ROS series with fixing element

S-Series cable ties made from Polypropylene (PP) are non hydroscopic, offer a higher chemical resistance and reduced CO2 footprint compared to a standard cable tie material. These cable ties are used to bundle and secure cables, pipes and/or hoses.

Features and benefits

- Pre-assembled 2-piece fixing tie with fir tree foot part
- Cable tie head can be moved after bundling
- Easy to assemble without the need for a tool
- Disc adjusts tie for pressure from various directions and minimises access of dust and dirt
- Fir tree foot part can be used for a variety of panel thicknesses
- Suitable for use within threaded holes
- DOP versions for oval holes feature anti-twist protection

Material specifications: See Article-No. on our website.

TYPE	Hole Ø (FH)	Panel Thickness	Width (W)	Length (L)	Bundle Ø max.	N	Material	Colour	Tools	Article-No.
S50ROS1DOP62x122	6.2 x 12.2	0.6 - 6.0	4.9	200.0	45.0	185	PP PA66HIRHS	BK	5	156-03586

Recommended Tools: 5=EVO7i. For more information on toolings please refer to the Application Tooling chapter on page 593.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

Please note: Some or all of the products listed here have these approvals, or have one or more sustainable attributes. Please see our website for the latest details.

1-piece fixing ties with deep hole anchor, with disc, for round holes

Deep hole anchor T30SOSASDHA6x11E

Features and benefits

- 1-piece fixing tie with deep hole anchor for secure installation in blind holes, with or without thread
- High pull-off forces enabled by integrated metal clamp
- Tool-free assembly simplifies installation and saves time
- Integrated disc compensates for pressure from various directions
- Disc design minimizes ingress of dust and dirt for enhanced durability

One piece fixing tie for round blind holes.

Material specifications: See Article-No. on our website.

T30SOSASDHA6x11E

TYPE	Hole Ø (FH)	Width (W)	Length (L)	Bundle Ø max.	 N	Material	Colour	Article-No.
T30SOSASDHA6x11E	5.9 - 6.1	3.5	128.6	25.0	200	PA66HS	BK	126-00429

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

2-piece fixing ties with deep hole anchor, with disc, for round holes

Deep hole anchor DHA5.5 - DHA8.4

Features and benefits

- Pre-assembled 2-piece fixing tie with deep hole anchor
- The high 'pull off' forces are due to the integrated metal clamp
- Cable tie head can be moved after bundling
- Easy to assemble without the need for a tool
- Disc adjusts tie for pressure from various directions and minimises ingress of dust and dirt
- Suitable for use within blind holes with or without thread

T50RDHA8.4x20-PA46 for blind hole applications and with higher temperature requirements, include transportation cap to protect the harness during transportation.

Material specifications: See Article-No. on our website.

Fixing tie with deep hole anchor

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

Arrowhead cradle

SF/TM-Series

Offering simple and easy methods of securing cables or pipes, these fixing accessories have many applications within a wide range of industries.

Features and benefits

- Arrowhead fixing for use in pre-drilled or punched holes
- Ideal for applications with limited space and restricted access
- Parts with disc protect against dirt and dust

TM1SF for secure fixing of cables into pre-drilled or pre-punched holes.

Material specifications: See Article-No. on our website.

All dimensions in mm. Subject to technical changes.

Please note: Some or all of the products listed here have these approvals, or have one or more sustainable attributes. Please see our website for the latest details.

Fixing elements with fir tree, for distance routing

Saddle mount

These heavy duty fixing offers excellent performance for ship building and the truck and construction vehicle industries.

Features and benefits

- For parallel routing of four bundles
- Secure alignment to the bundle due to H-design
- For cable ties up to 13.0 mm wide
- Pre-fixing of tie with integrated nose

The mount can secure up to 4 separate bundles, providing parallel spacing between the frame rail and adjacent bundles.

Material specifications: See Article-No. on our website.

All dimensions in mm. Subject to technical changes. Minimum Order Quantity (MOQ) may differ from package content. Other packaging options may also be available.

Automatic bundling

Fir tree clips for automatic cable tying systems

Features and benefits

- Clips to fix cables and harnesses in the automotive and white goods industries
- Optimized for use automatic cable tying systems
- Easy to apply
- The fixing elements can be tied automatically with ATS Flex

Fixing elements for automatic bundling.

Can be used with Automatic Cable Tying Systems on page 596.

Fixing elements for T-slotted aluminium frames

ACFM-Series

The Aluminium Clip Frame Mounts (ACFM-Series) are specifically designed for use with aluminium construction profiles. Installation and handling is seamless - simply twist the mounts 90 degrees to secure them firmly into position at the desired positions along the profile. These mounts can also be loosened and repositioned easily for quick adjustment and the ongoing maintenance of cables. The range of aluminium frame mounts are suitable for use with various aluminium construction profiles from a range of manufacturers.

Features and benefits

- Quick and easy to install (quarter-turn fixing)
- 2-way cable tie entry, allowing cables to be fixed lengthways or sideways to the profile
- Curved design ensures that cables are supported centrally to the mount
- Secure fixing once installed
- Suitable for cable ties up to 8 mm wide

The Aluminium Clip Frame Mounts (ACFM) are specifically designed for Aluminium Construction Profiles.

Material specifications: See Article-No. on our website.

Wire push in clips

WPC-Series

With the increased complexity of electronic and electrical installations the use of WPC Clips enables cables to be installed using a minimum amount of space. A perfect solution for the frame/rails of control cabinets or the white goods industry.

Features and benefits

- Accept single or multiple wires
- Simply push wires into place
- Arrowhead design for simple and secure installation
- Access to panel only needed from one side

WPC – Wire Push In Clip.

Material specifications: See Article-No. on our website.

WPC Wire Push In Clip (side view, front view, in application)

TYPE	Drawing	Hole Ø (FH)	Panel Thickness	Width (W)	Length (L)	Height (H)	Material	Colour	Article-No.

All dimensions in mm. Subject to technical changes.

Fixing elements with arrowhead for round holes

Harness push in clips, HC-Series

This fixing element is pressed into a hole manually and locks into place with an audible click. Cable bundles can be applied afterwards.

Features and benefits

- Accept single or multiple wires
- Simply push wires into place
- Arrowhead design for simple and secure installation
- Access to panel only needed from one side
- Harness clip made of polypropylene (PP) offers a lower CO₂ footprint compared to PA66 making it a more sustainable choice without compromising on performance

Harness clip made of polypropylene with arrow head for round holes 6.3 mm.

Material specifications: See Article-No. on our website.

HC10.5WPM6.3

Please note: Some or all of the products listed here have these approvals, or have one or more sustainable attributes. Please see our website for the latest details.

Fixing elements for tubes and harnesses

KSFT6.5OC with low arrowhead

These fixing elements can be used in a wide range of applications where space saving work is necessary.

Features and benefits

- Fixing part with rounded arrowhead to minimise assembly height
- Ideal for applications where space is limited
- Simply clip on a wire or hose
- Bundle diameter is defined
- Suitable for post-installation of bundles

The very low arrowhead is specially designed for narrow installation spaces.

Material specifications: See Article-No. on our website.

LadderClamp

for installation on cable ladders

Features and benefits

- Time saving
- Quick installation
- Ergonomic installation saves the installers shoulders
- No waste
- Fix the cables in place
- Reusable
- No tool needed
- Fits to cable ladders of brand MP-bolagen and Wibe
- Ladder clamp made of polypropylene (PP) offers a lower CO₂ footprint compared to PA66 making it a more sustainable choice without compromising on performance

Material specifications: See Article-No. on our website.

Fixing elements for tubes and harnesses with automatic locking feature

with arrowhead, for round holes

Offering a simple and secure method of attaching cables to panels. Originally designed for the automotive industry, these products are used in a wide range of applications with sheet metal panels across various industries.

Features and benefits

- Push and click closure for fixing of wires
- Clip is clicked into a specific hole
- AHC()SS und AHC()SB can be pushed onto a 5.0 mm stud

Automatic Harness Clip closed.

Automatic Harness Clip open.

Material specifications: See Article-No. on our website.

Fixing elements for tubes and harnesses with automatic locking feature, connectable

IAHC-Series, connectable

Offering a simple and secure method of attaching cables to panels. Originally designed for the automotive industry, these products are used in a wide range of applications with sheet metal panels across various industries.

Features and benefits

- Push and click closure
- Coupling elements of the IAHC variants allow parts to connect
- IAHC(J)T can only be connected with another IAHC element
- Vibration resistant, rattlefree and secure hold of bundle
- In case of maintenance easy replacement of bundle possible
- 360 degree rotatable for guiding bundles in different directions

IAHC(J)AH in combination with an IAHC(J)T.

Fixing elements for tubes and pipes

with fir tree for round holes and cover, LOC-Series

These clips offer fast and easy bundling of convoluted tubes and pipes, especially for the automotive industry.

Features and benefits

- For fixing and bundling convoluted tubes and pipes
- Vibration resistant, rattle-free and secure hold of bundle
- In case of maintenance easy replacement of bundle possible

The locking clamps of the LOC-Series offer fast and easy bundling of convoluted tubes and pipes.

Material specifications: See Article-No. on our website.

Fixing elements for tubes and hanneses

with fir tree

This Fixing Element is pressed into a hole by hand and locked into place with a hearable click. Cable bundles can be applicated afterwards.

Features and benefits

- Easy to install without the need for a tool
- Types with disc cover the hole and protect against dirt and dust ingress
- Rattlefree and secure hold of bundles due to retaining collar
- Suitable for post-installation of bundles
- Easy replacement of bundles in case of maintenance

The HC48FT6 is designed for Bundle diameter 4.3 - 5.2 mm.

Fixing elements for corrugated tubing, with arrowhead

for round and oval holes

These holders are used in the automotive industry, in the production of cable harnesses and in the electrical industry. Their quick and easy mounting is the reason for their universal success wherever corrugated tubing and pipes have to be fixed quickly and securely.

Features and benefits

- Clamps for corrugated tubing for a variety of nominal diameters
- Arrowhead simply locks into place
- Tube is guided accurately by clicking
- Axial slipping is prevented by the inside profile of the clamp

Simple and secure installation of pipes or hoses to panels.

Material specifications: See Article-No. on our website.

Fixing elements for corrugated tubing, with fir tree

CTC-Series

CTC clamps are used for example in the automotive, harness making, electrical industry and wherever corrugated tubing has to be quickly and firmly fixed.

Features and benefits

- CTC clamps for a variety of nominal diameters
- Fir tree foot part can be used for a variety of panel thicknesses
- Suitable for use within threaded holes
- Tube is guided accurately by clicking
- Axial slipping is prevented by the inside profile of the clamp

The tubing clips into the CTC clamp and is held firmly.

Material specifications: See Article-No. on our website.

Fixing base

LOK-Series

The LOK mounts, in conjunction with a cable tie, can be used either indoors or outdoors for a diverse range of applications from holding climbing plants, to securing cables running between buildings.

Features and benefits

- LOK01 – LOK05 usable with any cable ties up to 9 mm wide
- Suitable for a wide range of materials, including concrete, brick, block and wood
- Installed by knocking into 7 mm or 8 mm diameter hole
- LOK01B is designed for soft brickwork and 6 mm holes
- Elongated head of LOK05 for setting bundles at a distance from brickwork

LOK01 fixing bases for indoor and outdoor use.

Material specifications: See Article-No. on our website.

Please note: Some or all of the products listed here have these approvals, or have one or more sustainable attributes. Please see our website for the latest details.

Rivet mount

TY5-Series

The TY Fixings are ideal for use where a high pull out force is required (eg. in the aircraft industry). The two piece 'wedge' ensures that once installed the mounts will not come away from the panel. Particularly designed for areas with restricted access.

Features and benefits

- Quick installation
- Two-piece wedge
- Easy insertion
- Firmly fixes wide variety of cable ties

Rivet Mount TY5 is usable with a wide variety of our cable ties.

Material specifications: See Article-No. on our website.

Plastic rivets

TY-Series

These simple to use plastic rivets are ideal for improving productivity in the working environment, saving time and money over more conventional jointing methods. Ideal for joining panels, or components to panels in a wide range of industries from automotive to panel building.

Features and benefits

- One Piece
- Simply push pin into body of rivet
- TY3P1 and TY8P1 pins inserted using rivet placement tool

Plastic Rivet TY8P1 in application.

Material specifications: See Article-No. on our website.

Blind plugs

for round holes

Our Plugs were developed especially for the automotive industry. Application in trunks, doors, wheel housing and dash panels. Whenever needed to secure a hole against dirt or dust. Sometimes even used for optical reasons.

Features and benefits

- Easy assembly without the need of a tool
- Disc covers the hole and minimises ingress of dust, dirt and water
- Type "TRIM PLUG 5" with additional retainer to fix panel or cover

Blindplugs are available in different dimensions and materials.

Material specifications: See Article-No. on our website.

Bundling clips, with arrowhead

for round holes

Originally designed for the automotive industry, these clips offer simple and easy methods of securing cables, hoses or pipes.

Features and benefits

- Easy to install without the need for a tool
- Cable tie head always situated in defined position
- Arrowhead simply locks into place
- Disc adjusts tie for pressure from various directions and minimises access of dust and dirt
- ATS fixing elements can be applied with Autotools ATS Flex or CPK Hybrid

BundlingClip with OmegaClip, BundlingClip with foam, BundlingClip LRJ1

BCSFT6.5 16-3MD		6.3 - 6.7	1.5 - 3.0	55.0	PA66HIRHS	Black (BK)	155-11601
ATSBSCFT6.5-MD		6.3 - 6.7	2.0 - 3.0	39.0	PA66HIRHS	Black (BK)	102-69065

All dimensions in mm. Subject to technical changes.

Bundling clips with arrowhead for round holes

for distance routing

Originally designed for the automotive industry, these clips offer simple and easy methods of securing cables, hoses or pipes. These parts are used in the automotive industry for assembly of cable harnesses.

Features and benefits

- Easy to install without the need for a tool
- Arrowhead simply locks into place
- Disc adjusts tie for pressure from various directions and minimises access of dust and dirt
- Versions for oval holes feature anti-twist protection

StandOff Clips allow cable looms to be routed at a set distance from the punched holes.

Material specifications: See Article-No. on our website.

Stand Off Clip SOC

TYPE	Drawing	Hole Ø (FH)	Panel Thickness	Length (L)	Length (L2)	Material	Colour	Article-No.
STAND-OFF-CLIP-2		6.5 - 6.8	0.4 - 1.6	40.0	25.0	PA66HIRHS	Black (BK)	155-01600

All dimensions in mm. Subject to technical changes.

Bundling clips with fir tree

for round holes

Widespread used in cable harness production; a quick and easy means of fixing cables and wires securely in various parts of cars.

Features and benefits

- Easy to install without the need for a tool
- One fir tree foot part can be used for a variety of panel thicknesses
- Suitable for use within threaded holes
- Holding tabs prevent the tie slipping sideways
- ATS fixing elements can be tied automatically with the ATS3080 tool

BundlingClips with fir tree bases for a variety of applications with a wide range of metal thicknesses and drill holes.

Material specifications: See Article-No. on our website.

TC4FT6LG

Bundling clips with fir tree

for oval holes

The ATSDBCFT62x122 in combination with our ATS Flex is a perfect match for the automatization of a HV harnesses.

Features and benefits

- Effortless, tool-free installation – can be mounted easily by hand without the need for tools
- Flexible attachment options – compatible with both cable ties and adhesive tape
- Oval base geometry – ensures defined cable routing and provides reliable anti-twist protection for secure positioning

Our ATSDBCFT62x122 is specially made for the automatization of HV harnesses.

ATSDBCFT62x122.

Material specifications: See Article-No. on our website.

TYPE	Hole Ø (FH)	Panel Thickness	Width (W)	Length (L)	Height (H)	Material	Colour	Article-No.
ATSDBCFT62X122	6.2 x 12.2	0.7 - 4.5	11.0	56.0	25.0	PA66HIRHS	Black (BK)	151-04379

All dimensions in mm. Subject to technical changes.

Bundling clips with fir tree for oval holes

for distance routing

Originally designed for the Automotive industry, these clips offer simple and easy methods of securing cables or pipes and have many applications within a wide range of industries.

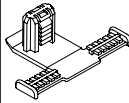

Features and benefits

- Easy to install without the need for a tool
- One fir tree foot part can be used for a variety of panel thicknesses
- Suitable for use within threaded holes
- Disc covers the hole to prevent dust and dirt gaining access
- Bundle runs in a set distance to the hole

Material specifications: See Article-No. on our website.

TYPE	Drawing	Hole Ø (FH)	Panel Thickness	Length (L2)	Material	Colour	Article-No.
ATSBCSOC6.2x12.2		6.0 x 12.2	0.6 - 6.0	15.0	PA66HIRHS	Black (BK)	151-01882

All dimensions in mm. Subject to technical changes.

Bundling Clips for Weld Studs, lateral adjustment

Bundling Clips for Weld Studs, lateral adjustment

Originally designed for the automotive industry, these clips offer simple and easy methods of securing cables, hoses or pipes. These parts are used in the automotive industry for assembly of cable harnesses.

Features and benefits

- Easily mounted onto the bundling bar using cable ties or adhesive tape
- Enables lateral adjustment for flexible positioning on the mounting surface
- Low-profile version for tight spaces, and elevated version for enhanced grip and secure positioning on weld studs

The slim line BC series is particularly compact and flexible.

TYPE	Drawing	Stud Ø	Length (L)	Material	Colour	Article-No.
BC30		5.0	55.0	PA66HIRHS	Black (BK)	151-00016
BCUWS5-D5-25		5.0	50.0	PA66HIRHS	Natural (NA)	151-00851

All dimensions in mm. Subject to technical changes.

Bundling clips for weld studs

for distance routing

Features and benefits

- Compatible with cable ties or adhesive tape – for flexible bundling options
- Suitable for automation – can be processed with the ATS (Autotool System) for efficient assembly
- Tool-free installation – can also be easily mounted by hand
- Defined spacing to the bundle – allows for slight distance between clip and harness to avoid pressure or abrasion

Bundling clip, for stud 5 mm. The article is designed for our ATS flex but it could be use also with cable ties or tapes.

TYPE	Stud Ø	Width (W)	Length (L)	Height (H)	Material	Colour	Article-No.
ATSBC60SOC20SB55	T5	31.0	60.0	16.2	PA66HIRHS	Black (BK)	102-68368

All dimensions in mm. Subject to technical changes.

Bundling clips

for edges

EdgeClips are used in the automotive and electrical industries and are ideal when it is impossible to drill holes or no other fixing points are available.

Features and benefits

- Easy assembly, just shuffle manually
- Designed for edges of 1 - 3 and 1.5 - 4 mm
- Integrated metal clamp holds clip firmly in place
- Clamp consists of double tempered steel spring
- ATS fixing elements can be tied automatically with tools ATS3080, AT2000 or AT2000CPK

Cables and leads can be fastened with a cable tie or adhesive tape to the bars of the mounting element.

Material specifications: See Article-No. on our website.

2-piece fixing ties for parallel separation

twistable up to 90°

Features and benefits

- Pre-assembled 2-piece fixing tie with coupler
- Cable tie head can be moved after bundling
- Easy addition of cables after assembly
- For parallel routing of bundles that can be twisted 90° even after installation

T50RCOUPLER for parallel routing.

Material specifications: See Article-No. on our website.

2-piece fixing ties for parallel separation

twistable up to 360°

Features and benefits

- Pre-assembled, 2-piece fixing tie for quick and efficient installation
- Integrated anti-slip serration prevents cables and cable harnesses from slipping sideways
- Enables cables to be added easily even after initial installation
- Enables parallel routing with 360° rotation to compensate for movement - ideal for use in dynamic or vibration-prone environments

Our T50SOSASVCD-SO17 is a 360° twistable fixing tie with an anti-slip serration on the inside, designed to prevent undesired lateral movement of cables and harnesses.

Material specifications: See Article-No. on our website.

Cable tie mount for parallel routing, twistable 360°

DSWS-Series

These fixing element for parallel routing can be used where bundles need separation from each other combined with the necessary functionality to support moving harnesses.

Features and benefits

- For parallel routing of bundles that can be twisted 360° even after setting
- Secure alignment to the bundle due to H-design
- Cable tie head can be moved after bundling
- For cable ties up to 12.7 mm wide
- For post-installation of bundles

The spacers can be easily rotated by hand, allowing the bundles to be crossed and rotated at any angle.

Material specifications: See Article-No. on our website.

Information and installation instructions for self-adhesive mounting bases

HellermannTyton uses different types of adhesives for self-adhesive bases: acrylate and synthetic rubber. These differ in the operating temperature range and the 'pull off' force of the adhesive. Synthetic rubber has an excellent initial grip, allowing for almost immediate use.

Acrylate adhesive has less initial grip, so there might be a need to wait for a few hours before use (depending on the surface), but has a higher, "pull off" force than synthetic rubber. This enables a permanent fixing lasting months or even years.

Instructions for use

1. The surface must be dry, free from dust, oil, oxides, parting agents and other impurities. The surface to be glued should be cleaned using a clean cloth and isopropanol/water (50/50). When using other appropriate cleaning agents, ensure that they do not attack the surface nor leave any residues. After cleaning allow the surface to air-dry completely.

2. Peel off protective backing and ensure the adhesive area is not touched.

3. Press down firmly on the base with the thumbs for several seconds.

4. Depending on the type of adhesive, wait for several minutes (synthetic rubber) or hours (acrylate) so that the adhesive can bond completely with the surface.

We will be happy to send you on request an up-to-date technical datasheet for whichever adhesive you are using.

Fixing elements for use with paste adhesive

In-Line Ratchet P-Clamp

The In-line Ratchet P-Clamp family offers versatility when managing wires, cables and hoses. The robust design and durable materials make it ideal for heavy duty applications, both indoors and out. The adjustable clamp can be closed by hand to the desired diameter. The release feature allows easy and nondestructive removal of cables simply by using a flat-head screwdriver. In this way, the clamp can be reused or serviced without removing it from the mounting surface.

Features and benefits

- One-piece ratchet closure allows for easy installation during pre- or final assembly
- Easy release feature simplifies quick adjustments and maintenance
- Impact modified, heat and UV stabilized PA66 provides long-term durability, indoors and out
- Can even be installed onto uneven surfaces
- Use with paste adhesive on the base to ensure a strong bond with the mounting surface

In-Line Ratchet P-Clamp for use with paste adhesive (IRCAPMB6CC).

Paste adhesive mount

PMB mount for uneven surfaces

PMB-Series offers a fixing solution wherever screw fixing is not allowed. Due to the design the mounts can even be installed onto uneven surfaces. PMB paste mounts are used in the railway industry as well as in the renewable energy industry. Further applications are in the electrical industry and the production of switching cabinets. PMB-Series is suitable for fixings with paste/liquid adhesive.

Features and benefits

- PMB-Series for fixings with paste / liquid adhesive
- Mount geometry offers a good form closure with cured adhesive
- Can even be installed onto uneven surfaces
- PMB6 can also be applied in combination with hot-melt adhesive, as mount is made of heat resistant PA66
- PMB3 is made of flame-retardant material PA666V0

Our PMB mount (paste mount adhesive) as an adhesive fastening for a strong hold, even overhead.

Our PMB-series size comparison – suitable for tighter spaces and areas where a strong, vibration-resistant hold is required.

Material specifications: See Article-No. on our website.

Cable tie mounts with high performance adhesive

FlexTack-Series FMB for round and angled surfaces

FlexTack cable tie mounts can be successfully applied to a variety of high- and low-energy surfaces such as glass, metals (including painted, varnished or powder-coated surfaces) as well as plastics. FlexTack provides a reliable fixing solution where it is impractical to use screws or bolts. The unique design in combination with the special acrylate adhesive makes professional cable management easy.

Features and benefits

- Flexible Mount for round and angled surfaces
- FMB mounts with homogeneous system of acrylic adhesive
- Allows greater design freedom and offers uniform stress distribution along with weight reduction
- Adhesive with high cohesive strength combined with good weathering resistance
- Innovative fixing solution for high and low energy surfaces
- Protection foil with finger lift for easy peel off
- Temperature resistance up to +105 °C
- 4-way entry for cable tie for quicker and more flexible installation
- FMB4APT-I is also suitable for high energy surfaces like metal or glass

Flexible cable tie mount, FlexTack in use on a concave surface.

MATERIAL	Polyamide 6.6, high impact modified, heat and UV-stabilised (PA66HIRHSUV)	Polyamide 6.6, heat stabilised (PA66HS)

Flexible mounts with cable clip, self-adhesive

FlexTack-Series FMB for round and angled surfaces

FlexTack cable tie mounts can be successfully applied to a variety of high- and low-energy surfaces such as glass, metals (including painted, varnished or powder-coated surfaces) as well as plastics. FlexTack provides a reliable fixing solution where it is impractical to use screws or bolts. The unique design in combination with the special acrylate adhesive makes professional cable management easy.

Features and benefits

- Flexible mount for round and angled surfaces
- One-piece self adhesive mount for quick and easy installation
- Can be used without cable ties offering process optimization
- Designed to hold wires, cables or hoses
- FMB mounts with homogeneous system of acrylic adhesive
- Innovative fixing solution for high and low energy surfaces
- Protection foil with finger lift for easy peel off

For more information on the types of adhesive please see page 152.

Cable tie mounts with high performance adhesive

SolidTack-Series QM

Q-mounts are ideally suited for holding cable ties in place. They would perfectly fit to all applications where a reliable and durable fixation is required. With its SolidTack adhesive Q-mounts offer an innovative fixing solution especially for low energy surfaces or if drilling a hole is not possible. Suitable for a wide range of applications on varnished or plastic or metal surfaces in many areas like electrical cabinet, railway, aerospace, automotive and agriculture machinery.

Features and benefits

- Q-mounts with homogeneous system of acrylic adhesive
- Perfect for combination with T-Series cable tie
- Very good initial adhesion, increases with time
- Innovative fixing solution for high and low energy surfaces
- Q-Mount base locks the cable tie in vertical position, means the hands are free to apply cables

SolidTack-Series QM - Cable Tie Mounts with high performance adhesive; screwable or self adhesive versions. Perfect for combination with T-series cable ties.

MATERIAL	Polyamide 6.6 (PA66)	Polyamide 4.6 (PA46)

Cable tie mounts Q-Series

Q-Mount Series QMA, self-adhesive

Q-mounts are ideally suited for holding cable ties in place. They would perfectly fit to all applications where a reliable and durable fixation is required. Self adhesive versions of our Q-Mounts are suitable for applications where using screws, nuts, bolts or drilling holes to fix cables is problematic, or not the first choice.

Features and benefits

- Screwable or self adhesive versions
- Perfect for combination with T-Series cable ties
- 4-way entry for cable ties
- Adhesive with high pull-off force
- Locks cable tie in vertical position, means the hands are free to apply cables

SolidTack-Series QM - Cable Tie Mounts with high performance adhesive; screwable or self adhesive versions. Perfect for combination with T-series cable ties.

For more information on the types of adhesive please see page 152.

Cable tie mounts with high performance adhesive

SolidTack-Series MB

SolidTack MB Series mounts have a square design and are fairly common in areas like electrical cabinet, railway, aerospace, automotive and agriculture machinery. The premium self-adhesive bonds well on high and low-energy surfaces like plastics, metal, varnish or paint and is suitable for a wide range of applications.

Features and benefits

- MB mounts with homogeneous system of acrylic adhesive
- Very good initial adhesion, increases with time
- Innovative fixing solution for high and low energy surfaces
- Protection foil with finger lift for easy peel off

SolidTack MB Series mounts with square design - screwable, self-adhesive - suitable for a wide range of applications like fastening of cables in the automotive machinery.

For more information on the types of adhesive please see page 152.

Cable tie mounts

MB-Series square design, self-adhesive

Where speed, simplicity and a firm fixing base are required these self adhesive clips are ideal. Particularly suitable for use in control cabinets, telecoms equipment or domestic appliances where the use of holes, screws, or nuts and bolts is impractical or undesirable.

Features and benefits

- Simple to instal
- Excellent security, particularly in areas of high vibration
- Maximum surface area with adhesive to achieve high pull-off force
- 4-way entry for cable tie for quicker and more flexible installation

MB-Series Mounts with square design.

For more information on the types of adhesive please see page 152.

Cable tie mounts with high performance adhesive

SMB-Series, 360° rotation

Engineered for dynamic applications with moving parts, this innovative mount provides a reliable cable management solution where cables and bundles need to flex. Its 360° rotatable head ensures full adjustability, while the self-aligning feature allows for precise placement, making it ideal for environments that demand flexibility.

Features and benefits

- Cable tie mount with 360° rotation
- Self-aligning function for easy installation of cables
- Ideal for moving parts & where cables need to flex in application
- Suitable for use within electrical cabinets & enclosures
- Compatible with cable ties up to a 4.8mm wide strap
- High strength synthetic rubber adhesive suitable for both high and low energy surfaces

Self-adhesive cable tie mount with 360° rotatable design.

For more information on the types of adhesive please see page 152.

Cable tie mounts with high performance adhesive

SolidTack-Series MB with S-Series Cable Tie

S-Series cable ties made from Polypropylene (PP) are non hydroscopic, offer a higher chemical resistance and reduced CO₂ footprint compared to a standard cable tie material. These cable ties are used to bundle and secure cables, pipes and/or hoses.

Features and benefits

- The S50ROS features a significantly lower CO₂ footprint compared to cable ties made of standard material, in line with sustainability goals in various industries
- The outside serration design ensures gentle handling of sensitive cables and bundles, reducing the risk of damage during installation and maintenance
- With an anti-slip feature on the inside, the S50ROS prevents undesired lateral movement of cables and bundles, maintaining tidy and organized cable management within vehicles
- MB mounts with homogeneous system of acrylic adhesive
- Very good initial adhesion, increases with time
- Innovative fixing solution for high and low energy surfaces

MATERIAL	Polypropylene (PP), Polyamide 6.6 (PA66)
Adhesive	Acrylate with base of acrylic foam
Operating Temperature	-40 °C to +85 °C

Cable tie mounts

MAGMB-Series square design, magnetic

Magnetic Mounts and Clips are innovative solutions designed to meet the demands of modern cable management and mounting needs. Combining ease of use with versatility, they offer a practical and efficient alternative to traditional mounting methods. Whether in dynamic work environments or temporary setups, these mounts and clips provide advantages that set them apart from other options.

Features and benefits

- Quick to install and easy to adjust once fitted (reusable)
- Flexible neodymium magnet with adhesive backing
- 4-way entry for cable tie for quicker and more flexible installation
- Ideal for use on steel surfaces where it is not possible to drill holes
- Suitable for challenging surfaces like slightly dirty areas where adhesives fail

MAGMB-Series magnetic mounts enable easy, drill-free cable organization.

MATERIAL	Polyamide 6.6 (PA66), Neodymium alloy R5 (NDFEBR5)
Operating Temperature	-40 °C to +85 °C
Flammability	UL 94 V2 (excluding adhesive)

Please note: Some or all of the products listed here have these approvals, or have one or more sustainable attributes. Please see our website for the latest details.

Flat ribbon and round cable mounts

FKH-Series, self-adhesive

These clips are ideal for use in applications which are difficult to access, or for areas where a self adhesive solution is the only possible fixing method (for example 'holes' would be unacceptable). The FKH clips are designed to retain flat ribbon cables - ideal for use in computer equipment, gaming machines and domestic appliances. Available as a self-adhesive mount or screw mount.

Features and benefits

- One-piece fixing mount for flat ribbon and round cables
- Increased mounting area ensures proper bonding
- Quick and easy installation
- Can be released and re-used easily
- Cable is gently fastened due to soft wings

Perfect solution to route cables along the office desk.

For more information on the types of adhesive please see page 152.

MATERIAL	Polyamide 6.6, high impact modified (PA66HIR)
Adhesive	Acrylate with base of polyurethane foam
Operating Temperature	-40 °C to +80 °C

Cable tie mounts

TY-Series rectangle design, self-adhesive

Where speed, simplicity, and a firm fixing base are required these self adhesive clips are ideal. Particularly suitable for use in control cabinets, telecoms equipment or domestic appliances where the use of holes, screws, or nuts and bolts is impractical or undesirable.

Features and benefits

- 2-way mounting base for safe guiding of cables and conduits
- Suitable for applications with minimal space
- Mounted before cable installation

TY-Series selfadhesive mounts with rectangle design.

For more information on the types of adhesive please see page 152.

Mounts with cable clip, self-adhesive

RA-Series

These mounts are ideal for use in applications which are difficult to access or for areas where self adhesive is the only possible fixing method and fixing holes would be unacceptable. The self adhesive mounts can be used without cable ties. Offering process optimization in industries like automotive, bus and truck, construction vehicles or industrial building.

Features and benefits

- One-piece self adhesive mount for quick and easy installation
- Can be used without cable ties offering process optimization
- Designed to hold wires, cables or hoses
- Different sizes for various bundle diameters available
- Two types of adhesive can be offered

Self adhesive one piece fixing mounts RA6 (l) and RB5 (r).

Mounts with cable clip, self-adhesive

RB-Series

RB-Series self adhesive mounts offer greater routing freedom and also reduce the risk of corrosion compared to screw fixing mounts. They are ideally suited for tool-free installation and can be re-opened and reused easily when cables need to be replaced. These mounts can be used without the need for additional cable ties. Offering process optimization in a variety of applications.

Features and benefits

- Flat design to use in applications with limited space
- One-piece self adhesive mount for quick and easy installation
- Can be used without cable ties offering process optimization
- Different sizes for various bundle diameters available
- Cost effective with easy application on smooth, clean surfaces

Self adhesive one piece fixing mounts RB20 (l) and RB14 (r).

Self Adhesive Clips

TY8H1(S) with flat design

Ideal for holding ribbon cables in computer equipment, gaming machines or domestic appliances.

Features and benefits

- Designed to hold cables, tubes or conduits without cable tie
- Simply screwed or stuck (TY8H1S) onto panel
- Side gripping fingers exert firm hold but allow for easy cable removal

Self adhesive mount for flat cables, TY8H1.

For more information on the types of adhesive please see page 152.

Mounts with flexible cable clip, self-adhesive

SAC-Series

These clips are ideal for use in applications which are difficult to access, or for areas where a self adhesive solution is the only possible fixing method and holes would be unacceptable. Typical applications include domestic appliances and trailers.

Features and benefits

- Bendable metal tongue for any shape or configuration of wires or cables
- Cost effective with easy application on smooth, clean surfaces

For more information on the types of adhesive please see page 152.

Malleable tongue allows for a variety of sizes per clip.

2-piece fixing tie with connector clip

Connector clip family

These two piece fixing ties with connector clips have been designed for electronic cables and cable sets used in the automotive industry. The connector are pushed onto the connector clip and hold firmly in place.

Features and benefits

- Easy, tool-free assembly for efficient installation
- Pre-assembled cable tie with connector clip for quick handling
- Connector can be removed without damage – ideal for maintenance or repositioning
- Rattle-free mounting ensures secure and noise-free fixation, even under vibration
- Made from PP/PA66HIRHS: combines sustainability benefits of PP (lightweight, chemically resistant) with the robustness and heat stability of PA66HIRHS

Material specifications: See Article-No. on our website.

Connector clips for round holes

with fir tree

The connector clips used here have been designed for electronic cables and cable sets used in the automotive industry. These parts are related to a connector and then secured to a surface depending on the requirement.

Features and benefits

- Connector easily installed by simply pushing into place
- Connection can be released (non-destructive)
- One fir tree foot part can be used for a variety of panel thicknesses
- Arrowhead simply locks into place
- Disc covers the hole to prevent dirt and water gaining access
- For twist protection: Variants with additional stick or for oval holes

ConnectorClips are available for many different connector types and fixing varieties.

Material specifications: See Article-No. on our website.

1-piece fixing ties for weld studs

For cable routing above the stud

Primarily designed for use in the automotive industry, these parts can be used in a wide variety of applications where weld studs or ISO bolts are used and cables need to be bundled and secured.

Features and benefits

- Cable tie head always situated in defined position
- Easy to assemble without the need for a tool
- Bundle runs directly above weld stud with defined stand-off from the panel

The T50SSBS50T-E / T50SSBS60T-E allows very precise routing of cable bundles.

Material specifications: See Article-No. on our website.

T50SSBS60T-E

TYPE	Drawing	Stud Ø	Width (W)	Length (L)	Bundle Ø max.	N	Material	Colour	Tools	Article-No.
T50SSBS50T-E		5.0	4.6	160.0	35.0	200	PA66HS	BK	1-2;4-7;25	155-30602
T50SSBS60T-E		6.0	4.6	160.0	35.0	200	PA66HS	BK	1-2;4-7;25	157-00083

Recommended Tools: 1=MK10-SB, 2=MK20, 4=MK3PNSP2, 5=EVO7i, 6=ProCut 9 no battery, 7=EVO9i, 25=EVOcut. For more information on toolings please refer to the Application Tooling chapter on page 593.

All dimensions in mm. Subject to technical changes. Since the bundled cables lie directly above or on the weld stud, care must be taken to ensure that the length of the weld stud does not exceed the height of the sheath. To avoid damage, we recommend a maximum weld stud length of 16.5 mm. N = Minimum Loop Tensile Strength for Cable Ties (newton)

1-piece fixing ties for weld studs

For cable routing alongside the stud

Primarily designed for use in the automotive industry, these parts can be used in a wide variety of applications where weld studs or ISO bolts are used and cables need to be bundled and secured.

Features and benefits

- Cable tie head always situated in defined position
- Easy to install without the need for a tool
- Bundles are routed very close to stud

T50SOSSBD-M8/10.

Material specifications: See Article-No. on our website.

T50SOSSBD-M8/M10

TYPE	Drawing	Stud Ø	Width (W)	Length (L)	Bundle Ø max.	N	Material	Colour	Tools	Article-No.
T50SOSSBU-M6		M6	5.7	175.0	30.0	150	PA66HSUV	GY	1;3;6-7;9-10;25	157-00065

T50SOSSBU-M8		M8	5.7	175.0	30.0	150	PA66HSW	GY	1;3;6-7;9-10;25	157-00066
T50SOSSBU-M10		M10	5.7	175.0	30.0	150	PA66HSW	GY	1;3;6-7;9-10;25	157-00067

Recommended Tools: 1=MK10-SB, 3=MK21, 6=ProCut 9 no battery, 7=EVO9i, 9=EVO9iHT, 10=MK9P, 25=EVOcut. For more information on toolings please refer to the Application Tooling chapter on page 593.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

1-piece fixing ties for weld studs, lateral adjustment

T50SOSWSP5E-2 for 5 mm studs, retainer height 3.5 mm

Primarily designed for use in the automotive industry, these parts can be used in a wide variety of applications where weld studs or ISO bolts are used and cables need to be bundled and secured.

Features and benefits

- Cable tie head always situated in defined position
- Easy to install without the need for a tool
- Provides 5 – 6 mm lateral adjustment
- Very low profile, stackable design
- For parallel routing of several bundles

T50SOSWSP5E, parallel installation using two fixing ties.

Material specifications: See Article-No. on our website.

T50SOSWSP5E-2

TYPE	Drawing	Stud Ø	Width (W)	Length (L)	Bundle Ø max.	N	Material	Colour	Tools	Article-No.
T50SOSWSP5E-2		5.0, 6.0	4.6	162.6	35.0	225	PA66HS	BK	1-2;4-5;25	133-01553

Recommended Tools: 1=MK10-SB, 2=MK20, 4=MK3PNSP2, 5=EVO7i, 25=EVOcut. For more information on toolings please refer to the Application Tooling chapter on page 593.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

1-piece fixing ties for weld studs

with stand-off, on the stud

Features and benefits

- Offset bolt design with flat geometry enables the retrofitting of an additional, higher fastening bracket for bolts - ideal for flexible integration into complex assemblies
- Anti-slip serration on the inside prevents lateral cable movement and ensures a secure and vibration-resistant hold
- Developed for demanding and space-constrained environments

T50SOSAS-Series offset stud mount cable ties are ideally suited for parallel routing (e. g. in combination with SB5-6 mounts).

Material specifications: See Article-No. on our website.

TYPE	Drawing	Stud Ø	Width (W)	Length (L)	Bundle Ø max.	N	Material	Colour	Article-No.
T50SOSASSO20AP5E		M5, M6, T5, T6	4.6	179.2	35.0	225	PA66HS	BK	157-04016

T50SOSASSO25AP5E		M5, M6, T5, T6	4.6	184.2	35.0	225	PA66HS	BK	157-04020

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

1-piece fixing ties for weld studs, for heavy duty applications

WS-Series for threaded studs

Wide strap stud-mounted cable ties are primarily designed for use in the automotive or truck industry.

Features and benefits

- Very flexible strap provides minimum pinching of soft hoses and convoluted tubing
- Low profile head for compact bundling
- Clamping rails to increase grip on round bundles
- Flexible hinge

The wide strap stud mount cable tie minimizes pinching on soft bundles.

Material specifications: See Article-No. on our website.

Wide Strap Heavy Duty Stud Mount Cable Ties

TYPE	Drawing	Stud Ø	Width (W)	Length (L)	Bundle Ø max.	N	Material	Colour	Tools	Article-No.

Recommended Tools: 6=ProCut 9 no battery, 7=EVO9i, 9=EVO9iHT, 10=MK9P. For more information on toolings please refer to the Application Tooling chapter on page 593.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

1-piece fixing ties for weld studs, for heavy duty applications

for parallel routing

Many applications require cables to be run parallel to each other but separated to avoid abrasion. The double mounting base, when used with two cable ties, allow this to be achieved simply and quickly. Widely used for securing cables, pipes and hoses in the automotive and truck building industries, the mounting base is simply pushed onto a 5mm diameter weld stud or bolt.

Features and benefits

- Parallel separation between hoses, wires, cables and tubing
- Abrasion protection
- Optional mounting hole for securing bundles along the Chassis of trucks, trails and heavy duty equipment

DCT products are made for parallel routing of harnesses with stud fixing.

Material specifications: See Article-No. on our website.

Dual Clamp Ties

TYPE	Stud Ø	Width (W)	Length (L)	Bundle Ø max.		Material	Colour	Tools	Article-No.
DCT11	M6	12.7	487.7	58.0	667	PA66HIRHSUV	BK	6-7;9-10	115-31100
DCT9	M6	12.8	331.0	33.0	667	PA66HIRHSUV	BK	6-7;9-10	115-00034

Recommended Tools: 6=ProCut 9 no battery, 7=EVO9i, 9=EVO9iHT, 10=MK9P. For more information on toolings please refer to the Application Tooling chapter on page 593.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

2-piece fixing ties for weld studs

for parallel routing

Widely used for securing cables pipes and hoses in the automotive and truck building industries, the mounting base is simply pushed onto a 5 mm diameter stud or bolt.

Features and benefits

- Pre-assembled 2-piece fixing tie with stud retainer
- For parallel routing of cables, hoses or harnesses
- Cable tie head can be moved after bundling
- Easy to install without the need for a tool
- For 5 mm studs or 5 mm ISO threaded studs
- Made from PP/PA66HIRHS: combines sustainability benefits of PP (lightweight, chemically resistant) with the robustness and heat stability of PA66HIRHS – perfect for demanding automotive environments

Parallel fixation of two cables.

Material specifications: See Article-No. on our website.

Recommended Tools: 1=MK10-SB, 2=MK20, 4=MK3PNSP2, 5=EVO7i, 25=EVOcut. For more information on toolings please refer to the Application Tooling chapter on page 593.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

Please note: Some or all of the products listed here have these approvals, or have one or more sustainable attributes. Please see our website for the latest details.

2-piece fixing ties for strong hold on smooth bundles

for weld studs, for parallel routing

Soft Grip mounts are especially designed for use with Soft Grip ties. The versatile combinations provide a variety of flexible fastening options for fluid management / cooling systems in vehicles. The Soft Grip Series is a unique semi-customised part solution and designed to save time, money and development effort. The foot parts of the mounts can be adjusted to individual customer requirements. In the event of maintenance, the cable tie can be easily removed using a screwdriver. Only the cable tie then needs to be replaced, not the whole fixing element.

Features and benefits

- Suitable for a variety of fastening requirements thanks to different foot parts (for holes, for studs, for screw fixings)
- Soft Grip cable ties assure high protection of sensitive harnesses and fluid system tubes
- Soft TPE inner layer inhibits lateral movements of the bundle, especially on smooth tubing
- Pre-locking feature holds the cable tie in place before it is tensioned
- Soft Grip cable ties can be removed with a screwdriver for maintenance
- EVO9SG application tool with adjusted nose piece available

The Soft Grip Tie in combination with the Soft Grip Mount for studs (weld studs) for parallel guidance of hoses in fluid management.

Soft Grip Cable Tie assembled with Soft Grip Mount for studs (weld stud).

Material specifications: See Article-No. on our website.

Fixing ties for weld studs

multi parallel routing, outside serrated

With our new "WAVE FIXING" products, we meet the increasing demand of parallel cable routing for electric vehicles.

Features and benefits

- Oval housing for welding studs enables tolerance compensation during assembly
- Supports a wider range of cable diameters for parallel bundling
- Cable tie head can be repositioned for ideal alignment with the cable bundle
- 'Soft-push' design enables effortless, tool-free manual assembly by hand
- Integrated retaining rib secures corrugated cables (e.g. protective conduits) and provides additional stability and protection in dynamic environments

Material specifications: See Article-No. on our website.

TYPE	Stud Ø	Width (W)	Length (L)	Bundle Ø max.	 N	Material	Colour	Article-No.
T50ROSCTMD26SB5-6	M5, M6, T5, T6	30.0	78.0	26.0	225	PA66HS PA66HIRHS	BK	156-03240

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

Fixing ties for weld studs

multi parallel routing, outside serrated

With our new "WAVE FIXING" products, we meet the increasing demand of parallel cable routing for electric vehicles.

Features and benefits

- For weld stud diameters, suitable for M5, M6, T5, T6
- Tolerances can be adjusted with an oval welding stud barrel
- A more varied selection of cable diameters can be bundled in parallel
- The cable tie head can be positioned in optimum bundle position
- "Soft-push" design for easy manual, tool free assembly

Fixing tie for cable bundles/for stud, outside serrated, 8.0-26.0mm

Multiple routing fixing tie for studs, outside serrated, for bundle diameters of 8.0-26.0mm.

Material specifications: See Article-No. on our website.

TYPE	Stud Ø	Width (W)	Length (L)	Bundle Ø max.	N	Material	Colour	Article-No.
T50ROSCTM16D26SB5-6	M5, M6, T5, T6	30.0	100.0	26.0	225	PA66HS PA66HIRHS	BK	156-03242

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

2-Piece Fixing Ties for Weld Studs

on the stud

Primarily designed for use in the automotive industry, these parts can be used in a wide variety of applications where 5mm weld studs or 5mm ISO bolts are used and cables need to be bundled and secured

Features and benefits

- Pre-assembled with integrated cable tie and weld stud mounting foot for quick and solid installation
- Low insertion force (~30 N or less) supports ergonomic and worker-friendly installation - ideal for high-volume production lines
- Enables secure bundling of very small diameters, starting at a diameter of just 1.0 mm
- Designed for sustainable workflows by reducing operator strain and minimising rework

Pre-assembled two-piece fastening tie with weld stud foot — enables quick, secure mounting on 5 and 6 mm bolts with insertion forces below 30 N.

Material specifications: See Article-No. on our website.

TYPE	Stud Ø	Length (L)	Bundle Ø max.	N	Material	Colour	Article-No.
T50RSBD5-6SD	T5, T6, M5, M6	202.0	45.0	225	PA66HS PA66HIRHS	BK	156-03416

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

Fixing elements for weld studs

SB-Series

Many industries (but specifically the automotive market) are using weld studs as the standard method of attaching components. Simply hammered onto the stud these parts provide ideal fixing bases for attaching cables, pipes or hose.

The use of weld studs avoids the problems with holes (ingress of moisture, corrosion etc).

Features and benefits

- Simple and quick method of fixing
- SBH1 and SBH3 allow cables to run across the panel

SBH2 allow cables to run at 90° to the panel.

Material specifications: See Article-No. on our website.

SBH1, SBH3

Cable tie base SBH1,3

TYPE	Drawing	Stud Ø	Width (W)	Length (L)	Length (L2)	Height (H)	Height (H2)	Strap Width max. (G)	Material	Colour	Article-No.
SBH1		5.0	12.5	26.8	9.0	13.9	15.9	8.5	PA66	Black (BK)	151-02260

SBH2		5.0	12.5	26.8	9.0	14.0	12.5	8.5	PA66	Black (BK)	151-26250

Recommended Tools: 6=ProCut 9 no battery, 7=EVO9i, 9=EVO9iHT, 10=MK9P. For more information on toolings please refer to the Application Tooling chapter on page 593.

All dimensions in mm. Subject to technical changes.

Fixing elements for weld studs

CT-Series

In areas with limited space these mounting bases allow the cable to be slightly offset from the fixing stud, and can be installed in the equipment prior to the cable installation. A major cost saving can be made using these products as they will allow the use of many different sizes of standard cable ties without the need to stock a wide range of specific fixing ties.

Features and benefits

- Ideal for cable ties up to 4.8 mm wide
- Simply pushed by hand onto an ISO or Fir Tree stud

Fixing Element CTMS5 allows bundles to be routed alongside the stud.

Material specifications: See Article-No. on our website.

CTMS5

Cable tie base CTMS5

All dimensions in mm. Subject to technical changes.

Fixing elements for tubes and harnesses with automatic locking feature

for weld studs

Offering a simple and secure method of attaching cables to panels. Originally designed for the automotive industry, these products are used in a wide range of applications with sheet metal panels across various industries.

Features and benefits

- Push and click closure for fixation of wires
- AHC()SS und AHC()SB can be pushed onto a 5.0 mm stud

Automatic Harness Clip closed.

Automatic Harness Clip open.

Material specifications: See Article-No. on our website.

1-piece fixing ties with mounting head for screws

M-Series

This range of one piece cable ties have a built in mounting hole and once fastened around the cables the bundle can be simply secured to the panel with a screw or bolt.

The tie is fitted to the panel first and then the cables can be added.

Features and benefits

- One-piece bundling and fixing tie
- Quick and easy installation

The mounting head ties can be easily screwed onto a panel.

Material specifications: See Article-No. on our website.

2-piece fixing ties for heavy duty applications, for screws

HDM-Series

Used in the automotive and truck industry for harness fixing in the engine body, these parts offer solutions in many other industrial applications with difficult environment.

Features and benefits

- Pre-assembled 2-piece fixing tie
- Cable tie head can be moved after bundling
- Secure alignment to the bundle due to H-design
- A suitable alternative for metal clamps
- Withstands vibrations and displacement forces
- High tightening torque through metal bushing

These HDM are suitable for assembling on screws.

Material specifications: See Article-No. on our website.

2-Piece Fixing tie for to screw

S50ROS series with CPC-fixing element

S-Series cable ties made from Polypropylene (PP) are non hydroscopic, offer a higher chemical resistance and reduced CO₂ footprint compared to a standard cable tie material. These cable ties are used to bundle and secure cables, pipes and/or hoses.

Features and benefits

- Pre-assembled 2-piece fixing tie with srew mount
- Cable tie head can be moved after bundling
- The S50ROS features a significantly lower CO₂ footprint compared to cable ties made of standard material, in line with sustainability goals in various industries
- The outside serration design ensures gentle handling of sensitive cables and bundles, reducing the risk of damage during installation and maintenance
- With an anti-slip feature on the inside, the S50ROS prevents undesired lateral movement of cables and bundles, maintaining tidy and organized cable management within vehicles
- For srew fixation M6
- Resists vibration and displacement forces and provides reliable performance in dynamic environments
- High torque due to integrated metal bushing for improved stability

Material specifications: See Article-No. on our website.

TYPE	Drawing	Width (W)	Length (L)	Bundle Ø max.	N	Mounting Screw Type	Material	Colour	Tools	Article-No.
S50ROSCPCM6		20.0	200.0	45.0	185	M6 Screw	PP PA66HIRHS	BK	5	156-03593

Recommended Tools: 5=EVO7i. For more information on toolings please refer to the Application Tooling chapter on page 593.

Please note: Some or all of the products listed here have these approvals, or have one or more sustainable attributes. Please see our website for the latest details.

Screwed Ratchet Clamp

for multiple parallel cable routing

The Screwed Ratchet Clamp can be used wherever cables are to be laid in parallel. The clamp can be mounted both horizontally and vertically. In the second assembly step the cables can be inserted. The component can be used to fix various cables or cable combinations as it can be filled in a range from 25 to 150 mm.

Features and benefits

- Cables and tubes can be bundled in parallel
- Can be opened and closed with one hand and without tools due to lever on the sliding element
- Re-openable, thus cables can be exchanged and added when required
- Can be screwed vertically or horizontally depending on the equipment
- After being screwed the locking cover/ lever is pushed onto the cable
- Allows a flexible accommodation of the cables with regards to the number of cables to be routed

Screwed Ratchet Clamp SRC150M8 for parallel bundling of cables and tubes.

Material specifications: See Article-No. on our website.

2-piece fixing ties for strong hold on smooth bundles

for screws

Soft Grip mounts are especially designed for use with Soft Grip ties. The versatile combinations provide a variety of flexible fastening options for fluid management / cooling systems in vehicles. The Soft Grip Series is a unique semi-customised part solution and designed to save time, money and development effort. The foot parts of the mounts can be adjusted to individual customer requirements.

In the event of maintenance, the cable tie can be easily removed using a screwdriver. Only the cable tie then needs to be replaced, not the whole fixing element.

Features and benefits

- Suitable for a variety of fastening requirements thanks to different foot parts (for holes, for studs, for screw fixings)
- Soft Grip cable ties assure high protection of sensitive harnesses and fluid system tubes
- Soft TPE inner layer inhibits lateral movements of the bundle, especially on smooth tubing
- Pre-locking feature holds the cable tie in place before it is tensioned
- Soft Grip cable ties can be removed with a screwdriver for maintenance
- EVO9SG application tool with adjusted nose piece available

Soft Grip Cable Tie assembled with Soft Grip Mount for screw fixing e.g. for fluid management / air conditioning pipes.

Screw fixing cable tie mounts

MB-Series square design, screwable

Designed specifically for holding heavier cable bundles these mounting bases can be used in many industries from Agriculture to Truck manufacture, they offer a very secure fixing and can be used with a wide variety of heavy duty cable ties up to 8mm wide.

Features and benefits

- Screwable or self-adhesive versions
- Simple to install with a screw or bolt
- Excellent security, particularly in areas of high vibration
- Maximum surface area with adhesive to achieve high pull-off force
- 4-way entry for cable tie for quicker and more flexible installation

MB-Series Mounts with square design.

Material specifications: See Article-No. on our website.

Cable tie mounts for food industry, detectable

MCMB-Series, screwable

MCMB mounts are ideally suited for holding MCT-Series cable ties in position, even in areas of high vibration such as food manufacturing equipment and automated packaging machines.

Features and benefits

- Distinctive blue colour for easy visual detection
- Simple to install with a screw or bolt
- Provides a secure fixing solution for routing cables, tubes and hoses
- 4-way entry for the cable tie leads to a quicker and more flexible installation
- Magnetic detectable – perfect for use with food and pharmaceutical grade detection equipment
- Total metal dispersion provides consistent detectability, even for small cut-off pieces
- Greatly reduces risk of contamination within food products
- Can support quality assurance in the production of food stuffs, for example HACCP

Detectable fixing solution containing of MCMB mount and MCT cable tie.

Material specifications: See Article-No. on our website.

Screw fixing cable tie mounts

TY-Series rectangle design, screwable

These products are designed for simple yet robust installation in a wide variety of applications. TY-Series mounts with a rectangular design are commonly used in telecoms equipment, switchgear and control cabinets. With its small and compact design TY3G1 offers an easy and rapid assembly for many different applications.

Features and benefits

- Screwable or self-adhesive versions
- Concave design to support larger diameter cables and bundles
- 2-way mounting base for safe guiding of cables and conduits
- Suitable for applications with minimal space
- Mounted before cable installation
- Usable with standard cable ties

TY-Series mounts with rectangle design.

Material specifications: See Article-No. on our website.

Flat ribbon and round cable mounts

FKH-Series, screw fixing

The FKH mounts are designed to retain flat ribbon cables. Ideal for use in computer equipment, gaming machines and domestic appliances. As each installation scenario is individual, FKH mounts are available in different dimensions and can be supplied as self adhesive and/or screwable versions.

Features and benefits

- One-piece fixing mount for flat ribbon cables
- Increased mounting area offers high strength
- Quick and easy installation
- Can be released and re-used easily
- Flat cable is gently fastened due to soft wings

Based on extremely soft wings any flat cable is gently fastened.

Material specifications: See Article-No. on our website.

Fixing can be realised with M3/
M5 screws or acrylic adhesive backing

Screw fixing cable tie mounts CTQM for limited space

CTQM-series

CTQM mounts are the ideal choice for applications that require reliable, permanent mounting - especially in confined or space-restricted environments.

Features and benefits

- 2-way mounting base for safe guiding of cables and conduits
- For cable ties up to 5 mm width
- Uses screw with countersunk head (max. \varnothing of head: 8.0 mm)
- Pre-assembly feature in combination with cable tie
- Holds the cable tie in vertical mounting position

CTQM 2-way entry, screwable.

Material specifications: See Article-No. on our website.

Screw fixing mounts

Cable tie mounts with curved design

Designed specifically for holding heavier cable bundles these mounting bases can be used in many industries from agriculture to truck manufacturing. They offer a very secure fixing and can be used with a wide variety of heavy duty cable ties up to 8.3 mm width.

Features and benefits

- Curved design for additional cable support
- Simple to install with a screw or bolt
- Excellent security, particularly in areas of high vibration
- Mounts are available in various sizes and materials

Screw fixing mounts

CTAM-Series for applications where space is limited

The CTAM series offers a range of mounting solutions that combine ease of installation with durability. Designed for a wide range of applications, these mounts are particularly valued in telecommunications equipment, switchgear and control cabinets. Thanks to their robust design, they are also a proven choice in the aerospace and railroad industries.

MCCTAM mounts (MC = Metal Content) are specially designed for use in hygiene-sensitive areas such as the food industry. Due to the integrated metal content, they can be detected by standard metal detection systems, which reduces the risk of contamination. They hold the MCT series cable ties securely in place, even in high vibration environments such as food processing machines and automated packaging lines.

All products in this range are screw-fastened, ensuring a stable and durable fastening even under dynamic loads.

Features and benefits

- Suitable for applications with minimal space
- Mounted before cable installation and in line with cable
- 4-way entry design for use in line or at 90° angle to cable run
- Available in different sizes and materials

CTAM mounts for applications with limited space.

Stainless steel P-mount to screw

Stainless Steel 316 mounts

Suitable for the secure fixing of cables, tubing, conduits and pipes within the most arduous of environments. Providing a complete fastening and fixing solution when used in conjunction with stainless steel ties up to 10.0 mm width. SSPC metal cable tie mounts are ideal for use within shipbuilding, oil and gas (offshore), industrial machinery and vehicles, food and beverage, power, renewable energy or process industries.

Features and benefits

- 2-way fixing for metal cable ties
- High performance stainless steel 316L material
- Heavy duty design
- Robust and durable solution
- Resistant to a range of chemicals in challenging environments
- Quick and easy to install
- Safe and secure solution for cables, tubing, conduits and pipes

Stainless Steel P-Mount SSPC for use in arduous environments.

Screw fixing mounts

MB-Series curved design, screwable

These cable tie mounts are very small in their overall size. They are designed for simple yet robust installation particularly in areas with high vibrations and/or limited space. They are a common fixing method for telecoms equipment, switchgear and control cabinets.

Features and benefits

- Small overall size for areas with limited mounting space
- Simple to install with a screw, bolt or rivet
- Excellent security, particularly in areas of high vibration
- Single hole fixing with two-way entry for cable tie

TY- (l) and MB-Series (r) with curved design, screwable.

Screw fixing mounts

LKM / CL / FH with curved design for sideways fixing

In areas with limited space these mounting bases allow the cable to be offset from the fixing hole, and can be installed in the equipment prior to the cable installation. A major cost saving can be made using these products as they will allow the use of many different sizes of standard cable ties without the need to stock a wide range of specific fixing ties.

Features and benefits

- Small overall size for areas with limited mounting space
- Screwable mounts for fixing cable sideways
- Ideal for securing large, heavier bundles
- Suitable for cable ties up to 8 mm width

LKM, CL8 and FH cable tie mounts for applications with limited space.

Clamps with elastical loop

Cradle clamp

Simple and versatile method of bundling cables. These clamps consist of two parts. The clamping base for mounting onto a panel and the elastical loop.

Features and benefits

- 2-piece fixing system consisting of a clamping base (C-part) and a reusable retaining ring (R-part)
- Allows cables to be added or removed after installation without tools
- Elastic loop enables quick and secure cable fastening by simply stretching over the clamp
- Suitable for dynamic environments where rework or maintenance is required
- Reopenable and reusable design supports sustainable cable management solutions
- Space-saving and simple method for routing and bundling cables on control panels

Cradle clamp - 2-piece fixing part consisting of clamp and retaining ring. The simple and versatile method of bundling cables.

2-Piece fixing cradle clamp.

Strain relief clips

Klam-Klip (KK)

Strain relief clips for gripping cables up to 8.5 mm bundle diameter. Strain relief clip is simply attached to mounting surface with an M4 fixing screw.

Features and benefits

- Simple 1-screw fixing to guide and secure leads
- Two halves of the clip are linked to ensure no loss of parts during re-wiring
- Anti-rotation pin prevents leads from twisting

Strain relief Klam-Klip in application.

Material specifications: See Article-No. on our website.

Harness clip for heavy duty applications, for screws or threaded bolts

Standard torque mounts

These heavy duty mounts (HDM) have been primarily designed for use in the automotive and truck industry. Nowadays they can be found in a variety of applications requiring heavy duty mounting in areas like the railway, defence and/or agriculture industry.

Features and benefits

- Design offers secure alignment to the bundle
- Possible replacement of cushion clamps and/or metal clamps
- Eliminates the needs for multiple sized fix diameter clamps
- For heavy duty cable ties up to 12.7 mm width
- High tightening torque
- Easy maintenance of bundle by simply changing the cable tie

Heavy Duty Mounts HDM-Series, patent number US5820083.

Material specifications: See Article-No. on our website.

Two way saddle mount for heavy duty applications, for parallel separation

for screws or studs

Heavy duty saddle mounts can be installed between two bundles to separate them and prevent chafing and wear. Fastened to a frame rail or mounting bracket, the special profile on the saddle mount provides a tight circumferential loop on large and small bundles. The saddle mount is an ideal assistant in many applications within the railway, truck and agricultural vehicle construction as well as in the ship building industry.

Features and benefits

- For parallel routing of different bundles to avoid wear and chafing
- Offers secure alignment to the bundle
- Can be used in combination with heavy duty cable ties
- Easy maintenance of bundle by simply changing the cable tie
- S2HM25 can be used with hex head screws 6.35

This saddle mount is installed between two bundles to separate them and prevent chafing and wear.

Material specifications: See Article-No. on our website.

Harness clip for heavy duty applications, for screws or threaded bolts for edges

SA-Series

This axial oval mount stands off bundles from frame rails and cross members to prevent them from rubbing and chafing. They can be perfectly used in combination with heavy duty cable ties up to 12.7 mm width – ideal to securely fix cables and wires in the railway and shipbuilding industry as well as in truck and agricultural vehicle construction.

Features and benefits

- Guides bundles securely above sharp edges
- For threaded bolts or screws
- Can be used in combination with heavy duty cable ties
- For cable ties up to 12.7 mm width

Axial oval mounts stand off bundles from frame rails and cross members to prevent them from rubbing and chafing.

Heavy duty mounts for 3-way routing

for screws or studs

These 3-way routing saddle mounts are designed to secure up to three bundles for multiple routing and reduce chavng or wear to those bundles. Applicable for various applications within the OEM, mass transit, defence or heavy truck and automotive markets.

Features and benefits

- For parallel routing of bundles
- Secure alignment to the bundle due to H-design
- Easy maintenance of bundle by simply changing cable tie
- Cable tie head can be moved after bundling

S3SB15CBM8 and S3CBM8.

Material specifications: See Article-No. on our website.

Suitable for external cylindrical hexagonal bolts M8

Suitable for welding studs (M8 internal bore & outer diameter 15 mm)

Ratchet P-Clamp

The Ratchet P-Clamp family offers versatility when managing wires, cables and hoses. The robust design and durable materials make it ideal for heavy duty applications, both in- and outdoors. The one-piece adjustable clamp can be closed by hand to the desired diameter. The release feature provides easy and nondestructive removal of cables simply by using a flat-head screwdriver. This nondestructive release allows the clamp to be reused without removing or replacing any bolts or screws. The Ratchet P-Clamp is offered in four sizes and multiple mounting configurations.

Features and benefits

- One-piece ratchet closure design allows for easy installation during pre- or final assembly
- Multiple configurations handle a wide range of diameters and applications, reducing part inventory
- Clamp interior is designed to guide and center bundle to reduce pinching
- Easy release feature allows for quick adjustments and maintenance
- Impact modified, heat and UV stabilized PA66 provides long-term durability, in- and outdoors
- Steel mounting plate tolerates high torque mounting and is treated to resist chemicals and salt spray

Ratchet P-Clamp - A more versatile way to mount and clamp cables.

Multiple configurations

The wiring schemes in heavy duty applications become more complex day after day. Using a single mounting point, you can combine Ratchet P-Clamps to match the number, position and diameters of the wires or bundles inherent to today's wire management challenges. You will see

below just a few of the nearly endless number of configurations you can arrange by mixing Ratchet P-Clamps of varying sizes and different mounting plates.

You can piggy-back Ratchet P-Clamps by using different length mounting plates to secure parallel cable configurations.

Ratchet P-Clamp mounting plates are shaped to allow face-to-face positioning. By using different length mounting plates, you can vary the distance between bundles and take advantage of the optimal routing path.

Add a spacer between Ratchet P-Clamps to speed installation and maintenance of stacked wire bundles.

90° angle mounting plates enable you to work around obstacles and protect wire from contacting moving parts.

For bundle diameters from 6.2 mm to 13.7 mm, A-Series

Ratchet P-Clamp Accessories

Protection inserts

Soft material inserts snap precisely into the body of the clamp to provide an enhanced level of protection for applications with movement, high vibration or soft cable bundles. An integrated rib on the top of the insert prevents a lateral displacement of the corrugated tube, for e.g. acceleration. This provides secure fastenings of a corrugated tube with vertical and horizontal alignment.

Features and benefits

- Soft inserts (for A - D Series) for an additional level of protection
- Torque support for defined contact pressure
- Use of manual processing Tool EVO possible
- CT-Insert offers low fire hazard and is conform to low smoke generation requirements (UL94 V0)
- CT-Insert offers low evolution of toxic gases and corrosive acids in event of an fire

Ratchet P-Clamps soft inserts offering an additional level of protection.

Heavy duty cable clamps

screwable, Inline Ratchet Clamps

The Inline Ratchet Clamp family is a perfect fit when facing space constraints or where offset mounting options are not ideal. Easily twists onto existing threaded rods, eliminating the need for additional hardware. The robust design and durable materials make it ideal for heavy duty applications, both in- and outdoors. The one-piece adjustable clamp can be closed by hand to the desired diameter. The release feature provides easy and nondestructive removal of cables simply by using a flat-head screwdriver. This allows the clamp to be reused without removing or replacing any bolts or screws.

Features and benefits

- Building on the Ratchet P-Clamp family, the Center Mount Ratchet Clamp (CMRC) family offers fast and versatile installation of lines, hoses and cables
- Designed for applications where space is limited or when a staggered mounting option is not ideal
- Depending on the variant, the CMRC can be screwed on with an M6/M8/M10 screw or attached to an M8 threaded bolt
- The variants for bolt attachment enable time-saving installation with a reliable hold

The Inline Ratchet Clamp family is a perfect fit when facing space constraints.

Material specifications: See Article-No. on our website.

Aluminium P-Clamps

Alu-P-Clamp with / without chloroprene insert

Manufactured from a high quality aluminium, these metal P-Clamps provide flexibility whilst providing a permanent fixing in the most arduous of environments. The addition of a chloroprene insert provides the cable or pipe bundle with a high degree of protection against vibration, reducing noise and also providing electrical isolation. They are commonly used in caravan construction, the defence and railway industry as well as in the renewable energy sector.

Features and benefits

- Simple and secure pipe or cable fixation
- Can be combined with chloroprene rubber for vibration resistance
- Ideal for use in high temperature applications
- Suitable for applications needing strength of metal components

P-Clamps manufactured in polyamide, aluminium or aluminium with a chloroprene insert.

Material specifications: See Article-No. on our website.

Plastic P-Clamps

HP-Series

For permanent or semi-permanent cable fixings this range of plastic P-Clamps can be used in many industries. Their light weight makes them particularly suitable for use in areas such as aircraft and aerospace where minimising weight, but retaining a strong fixing, is vitally important.

Features and benefits

- Manufactured from polyamide
- Good temperature resistance and high strength
- Wide range of sizes for every application
- Can be used without cable ties

P-Clamps H1P - H18P in different dimensions.

Mounting plates for screw fixing

MP-Series for parallel bundling

Many applications require each cable run to be firmly held in place but to be held separately from adjacent cable runs (example - control cabinets, machinery and military systems). The MP series of mounts can achieve this.

Features and benefits

- Allow multiple cables to run in parallel
- Simple to fix with two screws
- Cables are fixed by using a cable tie through any combination of the available slots

Screwable mounting plate MSMP.

Material specifications: See Article-No. on our website.

1-piece fixing ties for edges

EdgeClip-Series

The S50SOSEC1.5-4.0 mm is a one-piece fastening tie for edges, designed for fast and secure cable bundling directly on panel edges. It is suitable for edge thicknesses from 1.5 to 4.0 mm and can be mounted both parallel and perpendicular to the edge - offering a high degree of flexibility during installation.

The integrated PFAS-free spring steel clamp ensures a firm hold on various edge geometries without the need for additional fasteners. The product can be installed easily by hand or automatically. Ergonomic and controlled installation to protect workers and increase efficiency meets USCAR installation force requirements.

Made from sustainable polypropylene (PP) and featuring an anti-slip engraving, the S50SOSEC supports secure cable routing even in the event of vibrations while contributing to a reduced environmental footprint.

Features and benefits

- Can be installed straight or perpendicular to the edge
- PFAS-free spring steel clip
- Made from PP – lightweight, chemically resistant, and with a 55% lower carbon footprint compared to PA66
- Can be attached by hand and can also be automated with our tools
- Anti-slip engraving prevents the cable from moving during vibrations or transportation
- Ergonomic design with a 55% lower assembly force and ≤ 30 N compared to similar products – supports employee health, improves ease of use, and enhances assembly efficiency
- Meets USCAR mounting force requirements for safe and standardized installations

Ergonomically designed one-piece fastening tie with 100% PFAS-free EdgeClip and anti-slip engraving — allows ≤ 30 N insertion forces for efficient processing, can be rotated around the cable, yet stays securely fixed in position along the harness.

Material specifications: See Article-No. on our website.

1-piece fixing ties for edges

EdgeClip series

These cable ties and EdgeClip assemblies are ideal for use where holes are not acceptable or where due to temperature problems adhesives will fail. Once the cable tie is fastened around the cables the EdgeClip is presented ready for attaching to the panel. Widely used within the automotive and panel building industries these cable ties and EdgeClips save time and money.

The silver-grey clamp, the heart of our EdgeClips, consists of doubletempered spring steel in accordance with DIN EN 10132-4 C75S. The spring steel gives the clamp both the necessary rigidity to provide high pull-off forces and also sufficient flexibility for various possible applications.

The double coating is applied initially with a zinc plate system followed by inorganic surface sealing. Naturally, no chromium (VI) is used in this process. The clamp therefore complies with the current EU Directive 200/53/EC on end of life vehicles and the prohibition on heavy metals. The refined spring-steel clamp also fulfils the requirements for resistance to salt spray stipulated in DIN EN ISO 9227 NSS (min. 840 h without corrosion of base metal) and DIN EN ISO 6270-Z-CH (min. 720 h without corrosion of base material).

This solution has therefore been approved by many OEMs for exposed installation locations, e.g. in engine compartments and the running-gear area.

Features and benefits

- Easy assembly, just clip on per hand
- For edges of 1 - 3 mm, 1.5 - 4 mm, 3 - 6 mm, 4 - 6 mm or 6 - 8 mm
- Integrated metal clamp holds clip firmly in place
- Clamp consists of double tempered steel spring
- Ideal for applications where holes or adhesives are not suitable

1-Piece Fixing Tie T50SOSEC12 can be pushed easily on edges.

Material specifications: See Article-No. on our website.

2-piece fixing ties for edges

EdgeClip-Series, 0.5 - 2.5 mm, top fixing

These cable ties and EdgeClip assemblies are ideal for use where holes are not acceptable or where adhesives will fail due to temperature problems. These assemblies are widely used for fixing and bundling cables, pipes and hoses within the automotive industry, harness making, panel building and electrical industry. These EdgeClips are specially designed for applications where space is limited such as in mirrors and headlights.

Features and benefits

- For flat edges
- For thin edges 0.5 - 2.5 mm
- Small housing for limited space
- Pre-assembled 2-piece fixing tie with EdgeClip
- Cable tie head can be moved after bundling

T30ROSECO,5-2,5SPV for application on thin edges.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

2-piece fixing ties for edges

EdgeClip-Series, twistable

These cable ties and EdgeClip assemblies are ideal for use where holes are not acceptable or where adhesives will fail due to temperature problems. These assemblies are widely used for fixing and bundling cables, pipes and hoses within the automotive industry, harness making, panel building and electrical industry.

Features and benefits

- Pre-assembled 2-piece fixing tie with EdgeClip
- Easy to assemble by hand
- Cable tie head can be moved after bundling
- For edges of 1 – 2.5 mm or 1 – 3 mm
- Can be rotated to the desired position

EdgeClip CBTO50R, rotatable 90°.

Material specifications: See Article-No. on our website.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

3-piece fixing ties for edges

EdgeClip-Series, 1.5 – 4 mm

These cable ties and EdgeClip assemblies are ideal for parallel routing use where holes are not acceptable or where due to temperature problems adhesives will fail. These assemblies are widely used for fixing and bundling cables, pipes and hoses within the automotive industry, harness making, panel building and electrical industry.

Features and benefits

- Pre-assembled 3-piece fixing tie with EdgeClip
- For parallel routing of two harnesses
- For minimum bundle diameters of 2 mm
- For edges of 1.5 – 4 mm

TYPE	Panel Thickness	Width (W)	Length (L)	Bundle Ø max.	N	Material	Colour	Article-No.
T50ROSDEC1.5-4SP	1.5 - 4.0	4.6	200.0	50.0	225	PA66HS PA66HIRHS	BK	156-03291

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

2-piece fixing ties for edges

EdgeClip-Series, 1.0 - 3.0 mm

Features and benefits

- 2-piece fastening ties for edges for secure parallel routing of cable bundles
- Equipped with an integrated plastic side support for increased stability and surface contact
- Improved mechanical load distribution thanks to the additional molded support structure
- Designed for reliable hold during vibrations and movements
- Can be pushed onto the edge by hand
- Ideal for use in the automotive industry and in high-performance environments with demanding thermal and mechanical conditions thanks to the PA46

Efficient edge mounting - the EdgeClip ensures reliable cable routing along the panel edges without drilling.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

Fixing elements for edges

for edges of 6.0 - 17 mm

Our Frame Clamp is useable for edges 6 - 17 mm. You can use this mount with cable ties or with the Fixing SFTP to route cables or harnesses. This article is perfectly made for heavy duty applications. With our EVO9 cable tie tool is the application very easy. The EVO9 tool ensures that the same tightening force is used each time the component is fitted, and the high-performance adhesive also supports the very good fit of the Frame Clamp.

Features and benefits

- For edges 6 - 17 mm
- for cables ties up to 8.3 mm width
- Recording suitable for Fixing SFTP
- For multiple routing

TYPE	Panel Thickness	Width (W)	Height (H)	Material	Colour	Article-No.
FrameClampBS-SET	6.0 - 17.0	28.0	61.6	PA6GF15	Black (BK)	151-04249

Recommended Tools: 7=EVO9i. For more information on toolings please refer to the Application Tooling chapter on page 593.

All dimensions in mm. Subject to technical changes.

Heavy duty harness clips

Beam clamps / Wedge clips

Primarily designed for use in the automotive/truck industry, these parts can be used in a wide variety of industries and applications where bundles need mounting.

These heavy duty harness clips help to fix and secure cables, lines and hydraulic lines in truck, agriculture and railway vehicle construction, as well as in the ship building industry and industrial buildings.

Features and benefits

- Easy to install
- No damage to surfaces
- Easy maintenance of bundle by simply changing cable tie
- Cable tie head can be moved after bundling
- Applicable to a wide range of panel thicknesses

Two-piece ratcheting wedge design allows for easy, positive-locking size adjustment.

Material specifications: See Article-No. on our website.

Heavy Duty EdgeClip

HDEC-Series for heavy duty applications

The new Heavy Duty EdgeClips are specifically designed for high-load applications in challenging environments such as truck manufacturing, wind energy systems, and industrial installations including steel construction and structural beams. Installation can be carried out using either a dead blow hammer or, for the HDEC-Pre versions, water pump or channel lock pliers, offering flexibility on-site. The design allows for parallel routing of up to three cables and lines, supporting organized and efficient cable management even under demanding conditions.

Features and benefits

- PFAS-free metal clamp for environmentally conscious applications
- Supports up to three cable ties for secure multi-cable bundling
- Compatible with five panel thicknesses: 6–8 mm, 8–10 mm, 10–12 mm, 12–14 mm, and 14–16 mm
- Heavy-duty design ensures reliable performance in demanding environments

2-piece edge clip for heavy duty 14-16mm assembled

Fixing elements for tubes and harnesses, for edges

EdgeClip-Series

EdgeClips are used in the automotive industries and electrical industries and when it is impossible to drill holes or no other fixing points are available.

Features and benefits

- Releasable fixing elements with EdgeClip
- Low-vibration routing of bigger bundle diameters
- Clips to be pushed onto an edge
- To be closed single handed, a snap can be felt
- Bundles can be released at any time
- EC27: fixing element enables usage of smaller bundle diameter
- EC41: for parallel guidance of two bundles

EdgeClip cable and tube clips are suitable for the low-vibration routing of cables and tubes with larger bundle diameters.

Material specifications: See Article-No. on our website.

TYPE	Drawing	Panel Thickness	Attach to Ø	Material	Colour	Article-No.

Automatic bundling

EdgeClip-Series for automatic cable tying systems

Clips to fix cables and harnesses in the automotive and white goods industry.

Features and benefits

- Optimized for use automatic cable tying systems
- Easy to apply
- The fixing elements can be tied automatically with Autotool System ATS

Automized clip application.

Can be used with Automatic Cable Tying Systems on page 596.

TYPE	Drawing	Panel Thickness	Width (W)	Length (L)	Height (H)	Material	Colour	Article-No.

2-Piece fixing ties with pipe clip, twistable 360°

for multiple routing

Features and benefits

- Simply clip on a wire or hose
- Fixing clip offers full 360° rotation
- Routed cable can move in any direction in relation to the fixing point
- Inside serrated cable tie
- Made from PP/PA66HS: combines sustainability benefits of PP (lightweight, chemically resistant) with the robustness and heat stability of PA66HS

T50SVC5 rotates in any direction.

Material specifications: See Article-No. on our website.

TYPE	Drawing	Width (W)	Length (L)	Bundle Ø max.	Attach to Ø	N	Material	Colour	Tools	Article-No.

Recommended Tools: 1=MK10-SB, 2=MK20, 4=MK3PNSP2, 5=EVO7i, 6=ProCut 9 no battery, 7=EVO9i, 25=EVOcut. For more information on toolings please refer to the Application Tooling chapter on page 593.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

Please note: Some or all of the products listed here have these approvals, or have one or more sustainable attributes. Please see our website for the latest details.

2-Piece Fixing Ties with Pipe Clip, twistable 360°

for multiple routing

These inside serrated fixing ties provide the opportunity to attach a wire or hose to an existing harness. Offering a full 360 degrees rotation, the wire/hose can be oriented in any direction in relation to the main harness.

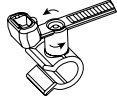

Features and benefits

- Simply clip on a wire or hose
- Fixing clip offers full 360° rotation
- Routed cable can move in any direction in relation to the fixing point
- Inside serrated cable tie
- Made from PP/PA66HIRHS: combines sustainability benefits of PP (lightweight, chemically resistant) with the robustness and heat stability of PA66HIRHS

T50SVC5 rotates in any direction.

Material specifications: See Article-No. on our website.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

2-piece fixing ties with pipe clip

twistable 360°

These inside serrated fixing ties provide the opportunity to attach a wire or hose to an existing harness. Offering a full 360 degrees rotation, the wire/hose can be oriented in any direction in relation to the main harness.

Features and benefits

- simply clip onto a wire or hose
- Fixing clip offers full 360° rotation
- Routed cable can move in any direction in relation to the fixing point
- Inside serrated cable tie
- Ideally used in the Automotive Industry

Cable tie combined with a 360° rotatable open clip that allows compensating movements and can be retrofitted to an already installed cable harness.

Material specifications: See Article-No. on our website.

TYPE	Drawing	Attach to Ø	Width (W)	Length (L)	Bundle Ø max.	N	Material	Colour	Tools	Article-No.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

2-piece fixing ties with pipe clip

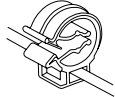

for multiple routing

Features and benefits

- Ideal for adding cables to pre-assembled cable harnesses.
- The open clip design makes it easy to insert additional cables
- Flexible cable routing - parallel or reverse cable routing
- The integrated retaining tab holds the cables securely in the clip and helps to reduce rattling and vibration noises

Material specifications: See Article-No. on our website.

TYPE	Drawing	Width (W)	Length (L)	Bundle Ø max.	Attach to Ø	N	Material	Colour	Tools	Article-No.

All dimensions in mm. Subject to technical changes. N = Minimum Loop Tensile Strength for Cable Ties (newton)

2-piece fixing ties with automatic harness clip

IAHC-Series

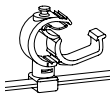

Features and benefits

- The cables activate the lock when they are pressed into the clamp, which enables quick, tool-free installation
- The free rotation between the clamp and the cable tie enables flexible positioning and optimised installation, even in difficult installation situations
- Supports different installation directions for maximum design flexibility
- IAHC = interconnectable automatic harness clip for multiple routing of cables and wires

T120R cable tie assembled with an IAHC.

Material specifications: See Article-No. on our website.

2-piece fixing ties with fir tree

for parallel routing

This Fixing Element is pressed into a hole by hand and locked into place with a hearable click. Cable bundles can be applicated afterwards.

Features and benefits

- Pre-assembled 2-piece element with cable clip and cable tie for round holes
- For parallel routing of cables, hoses or harnesses
- Easy to install without the need for a tool
- Cable bundles can be applicated afterwards
- For direct fixation
- Removable
- ERGO optimized footpart design, for reduced assembly forces

Two piece fixing tie with fir tree for round holes and with harness clip for cables 11.0 - 15.0mm.

Material specifications: See Article-No. on our website.

Fixing elements for tubes and harnesses

for multiparallel routing

The clips are used to guide HV cables, harnesses and tubes. The products are designed to offer high stability within the application. The ratchet closure makes it possible to guide different cable diameters in parallel.

Features and benefits

- 2-way clip for bundling and securing cables, for oval holes
- For parallel / multiple routing
- can be used without cable ties due to clip function
- Ratchet function allows for different cable diameters
- Clip can be opened for maintenance purposes without damaging the clip

Fixing element for parallel routing of two harnesses or tubes (12.2 - 18.0mm).

Fixing elements for multiple routing

with connecting element

Features and benefits

- Quick and easy installation
- Secure cable management and strain relief
- Adaptable design for various cable sizes and types
- Competitive pricing and long-term cost savings
- Minimize cable damage and safety hazards, ensuring reliable and long-lasting solar installations
- Affordable upfront costs and reduced maintenance expenses over the products lifecycle
- Reduce installation time, while optimizing project efficiency and labor costs
- Made from bio-based PA11, derived from castor oil, this solution combines high performance with a significantly reduced environmental footprint

QwicGrip, paired with a cable tie, offers dependable and efficient cable management for solar panels.

New innovative QwicGrip for fastening to e.g. solar rails with cable ties.

Material specifications: See Article-No. on our website.

This innovative new Qwicgrip can be easily combined with cable ties from our portfolio that are up to 8.8 mm wide.

Snapper hose clips for tubes and harnesses

SNP-Series

Our SNP range can be used as an alternative to metal hose clamps. Snapper can be used in markets as diverse as automotive, agriculture, white goods, venting systems, pumps and hydraulic systems to medical engineering.

Features and benefits

- Releasable and reusable plastic hose clamps
- Self-locking
- Releasable by giving a lateral movement to the 'head'
- Installation by hand possible
- Installation with processing tool for a secure tensioning
- For higher operating temperatures: Glass Filled PA66

SNP - Snapper Hose Clips range.

Material specifications: See Article-No. on our website.
