

Starrett Hole Saw Accessories

Debris Collector

Simply insert the arbor shank through the eyelet at the nylon base, before attaching to the drill, press the rim of the cowl against the surface of the material being sawn and begin sawing. The flange of the cowl then forms a seal against the material being cut, collecting all dirt and debris inside the cowl. Suitable for FCH/DCH/MPH/D Fast Cutting Multi Purpose and Bi-Metal Hole Saws up to and including 121mm (4.3/4").

Features and Benefits

- No clean up – no need for time consuming masking of areas prior to drilling or clean up after drilling
- No drill damage – no dust or debris in the drill motor
- No debris spread – no spread of dust in the air
- Works with bi-metal and multi-purpose hole saws
- Ideal when retro fitting/upgrading halogen downlighters to LED versions
