

Starrett Hole Saws

Tungsten Carbide Tipped Stainless Steel Sheet Metal Hole Saw

Ideal for cutting stainless steel and high alloy steels, non ferrous light metals and reinforced fabrics, at a much faster speed than is possible with a bi-metal hole saw.

The tough tungsten carbide tipped teeth have a positive cutting angle which provides fast and efficient removal of chips and swarf, recommended cutting depth is 2mm.

Features and Benefits

- Ideal for production cutting, and particularly suitable for use in drills with limited speed control
- Tungsten carbide tipped teeth provide superb product life and cutting performance
- Replacement pilot drills are available
- Complete assembly – there is no requirement to purchase a separate arbor and pilot drill
- Safety stop at the base of the hole saw prevents drilling beyond maximum cutting depth
- Recommended cutting depth is 2mm

Sheet Metal Hole Saw.

Sheet Metal Hole Saw Application.

| TYPE | Saw Dia | Pack Cont. |
|------|---------|------------|
| SM15 | 15mm | 1 |
| SM16 | 16mm | 1 |
| SM18 | 18mm | 1 |
| SM19 | 19mm | 1 |
| SM20 | 20mm | 1 |
| SM22 | 22mm | 1 |
