

Industrial Printer - TT4030

Main differences :

Feature	TT4030	TT4000 ⁺	Benefit
Performance:			
Connectivity	WLAN as standard	no WLAN support	remote connection of printer and database
Operation:			
Interface	Gigabit Ethernet (1000 Mbt)	10/100 Base T	higher data transfer rate higher productivity
Winding direction monitoring	Definition and monitoring of the winding direction of transfer ribbon via printer software	no monitoring of winding direction possible	easier to operate, less source of error
User interface	modern large user interface with touchscreen LCD colour display; clear menu structure	monochrome touchscreen LCD with smaller size	higher user convenience, intuitive operation, better user orientation
Set-up	insert video instructions for ribbon, change of print head etc	no video instruction	easy start for uneducated user
Hardware:			
Set-up	new printhead lever	less stable printhead lever	easier to operate, more stable
Set-up	quick action closure (only half turn) for transfer ribbon unwinder/rewinder and internal rewriter for carrier ribbon	no quick action closure	fast and easy to set up before printing
